

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Reporting Requirement(s) Not Met for Public Water Supply District #7

We were required to report a copy of the notice and materials sent to persons served by known or potential service lines containing lead to the State.

Our system failed to demonstrate to the State that it delivered annual notifications and information to affected consumers with lead, galvanized requiring replacement, or lead status unknown service lines as required by July 1, 2025. Although the failure to comply with the reporting requirement does not create a risk to public health, we are required to inform you of this violation and provide additional information including what we did to correct the situation.

It is important for consumers to know if the water they are receiving has been delivered through a lead, galvanized requiring replacement (GRR), or lead status unknown service line so they can make decisions on whether and what actions to take to reduce their exposure to lead in drinking water.

What should I do?

There is nothing you need to do at this time. You do not need to boil your water or take other actions. Remember, boiling water does not remove lead from water.

For more information on reducing lead exposure around your home/building and the health effects of lead, visit the EPA's websites at <https://www.epa.gov/ground-water-and-drinking-water/basic-information-about-lead-drinking-water> and <http://www.epa.gov/lead>.

What is being done?

*Affected customers were notified by mail on 12/11/25 and the state was notified by mail that notices were distributed. We received confirmation of receipt from the state on 1/30/26.

For more information, please contact Whitney Hill at (816) 386-2685 or PO Box 35 Weston, MO 64098.

This notice is being sent to you by PWSD #7. Public Water System ID# MO1024481.

Date distributed: 3/10/26
