

BSI Canal Committee 4/21/25

I am pleased to announce the completion of the Lock Widening Project!

According to the originally published schedule, work was completed 6 weeks ahead of schedule!!

The Canal Committee participated in the final inspection/walk-through, on Thursday, April 17, 2025, and everything looked great!

I would like to thank the members of Punta Gorda Canal Maintenance organization, and Kelly Brothers, the contractor, for all their work and effort into making this happen. If you will permit me to speak for all BSI residents: we will be forever grateful for this long overdue improvement to our canal system.

Also, I want to thank all residents of BSI for their understanding and patience throughout this period. Of course, while the work was progressing, there was the occasional obstruction of the Lock during the last few months, and except for a few isolated instances, all residence showed their willingness to allow Kelly Brothers to completed their work without significant distraction.

Anyway, I don't want to wax too long, but I do have a few photos attached –

And—as always---calm seas, warm breezes, and plenty two-handed fish—

Rick Daugherty, Vice Chairman, BSI Canal Committee
