

Durham Volunteer Fire Company

Insurance Information

Updated July 12, 2019

The Durham Volunteer Fire Company has an on-scene response time less than 6 minutes day or night.

For any structure fire dispatched in the Town of Durham, the following apparatus respond:

Durham Engine 1 – 2,250 GPM Pump 350 gallons of water and 4,600 ft of 5” supply hose

Durham Engine 2 – 1,750 gpm Pump, 1,000 gallons of water and 1,000 ft. of 5” supply hose

Durham Rescue 3 – 1,750 gpm Pump, 750 gallons of water and 800 ft. of 5” supply hose

Durham Engine 4 – 1,750 gpm pump, 1,000 gallons of water and 1,000 ft. of 5” supply hose

Durham Tanker – 750 gpm pump and 2,500 gallons of water

Automatic Mutual Aid is provided by:

Middlefield Engine 3 – 1,750 gpm pump, 750 gallons of water and 2,500 ft of 5” supply hose

Middlefield Tanker 5 – 500 gpm pump and 2,500 gallons of water

North Branford Tanker – 750 gpm pump and 3,000 gallons of water

Killingworth Engine 8-5-5 – 1,250 gpm pump, 1,000 gallons of water and 1,000 ft of 5” supply hose

Killingworth Tanker 8-6-8 – 500 gpm pump and 2,000 gallons of water

South Fire District Truck 34 – 1,500 gpm pump and 500 gallons of water

In addition, the Durham Volunteer Fire Company has mutual agreements with all member towns of the Valley Shore Mutual Aid Association and Middlesex County Fire Chief’s Association.

In the event of a multiple alarm fire a Tanker Task Force assignment may be deployed.

Level 1 Task Force will bring an additional five (5) tankers and one (1) water supply engine.

(12,500 gallons of water)

Level 2 Task Force will bring an additional five (5) tankers and one (1) water supply engine.

(Another 12,500 gallons of water)
