SMART · WEIGHT · BAR

- Pump-through logging tool that allows the operator to optimize CT interventions
- Redundant casing collar locator for depth correlation.
- Internal and external pressure sensors to monitor BHP and differential pressure across the downhole tools.
- Compact and rugged design. 2 1/8" OD, 1" ID, 2ft long and 1.5" AMMT connections
- Max absolute working pressure 20,000 psi
- Max differential pressure 10,000 psi
- Max temp 175DegC
