

Precision Radio Solutions LLC

Radio Programming & Support Capabilities

Company Overview

Precision Radio Solutions LLC is a locally owned and operated radio service provider based in Oklahoma. We specialize in programming, configuring, and maintaining two-way radio systems for public safety agencies, fire departments, and critical infrastructure operations across the state.

Our Services

- Programming of Motorola and Kenwood radios
- Support for P25 Phase 1 & Phase 2, DMR, and analog systems
- Custom codeplug development and replication
- Firmware updates and feature activations
- Field testing and RSSI diagnostics
- Antenna troubleshooting and deployment support

Technical Expertise

We are experienced in programming and supporting a wide range of public safety and commercial radios. We support radios operating on VHF, UHF, and 800 MHz bands across trunked and conventional systems, with a focus on reliability, system compliance, and field-tested performance.

Who We Serve

We are actively building partnerships with fire departments, emergency managers, and communications coordinators throughout Oklahoma. Our goal is to provide a reliable, local alternative to large vendors - offering quick response times, fair pricing, and customized service.
