MASKS-42-Studies-PeerReviewed (1).pdf;

if you want to consider the as misinformation that is your free right to do so, but it is now public record that you have received these studies on masks.

if you have any studies to the contrary i would be open to receiving them.

i would assume Nurse Espy would be quite knowledgeable and have a decent amount of study's showing the medical and psychological advantages of wearing masks and their effectiveness in stopping the spread of coronavirus.

thanks for all your great work!
