- Designed for Supermarkets, Convenience Stores, Produce and Meat & Fish Markets with Age Verification.
- Cloud Based for Data Safety and Security. Fast EMV Credit and Debit Payments, EBT, eWic and Checks.
- Our POS touchscreens are intuitive and user-friendly, the result of years of market research and optimization.
- Highly Customizable to meet the needs of today's business owners.

Because the supermarket industry is ever-evolving and multifaceted, **BackOffice Supermarket POS System** is built with the multi-format retailer in mind, allowing you to synchronize the supermarket store processes and data with the overall store, warehouse, and HQ systems.

Our Supermarket POS Software offers a highly configurable touchscreen and our Software System simplifies critical day-to-day operations, improves customer service, and helps drive higher sales margins. The **BackOffice Supermarket POS System Software** includes high throughput scanner scales, customer activated pin debit, EBT, and WIC. Real Systems Solutions provides a Handheld Inventory Scanner for price checking on the floor or receiving in the backroom.
