

# MAM-LIGHT

MAM-Light is the most compact Miko Anchor Magnet, yet it has a holding force equivalent to the weight of an adult man. Thanks to its handy size and minimal weight, this magnet is a basic necessity for any diver in any situation.

The Miko Anchor Magnets form a series of powerful and robust underwater fixing points. With holding forces ranging from 90 kg to 2 000 kg, these magnets are used worldwide for a wide range of applications.

The magnetic component consists of neodymium which is coated with nickel and epoxy to improve its corrosion resistance in sea water. The magnet is equipped with a breaking lever for easy release and safe operation.

All Miko magnets are shipped in a double-skin steel box to isolate the magnetic field and to prepare them for air freight.

Read "IMPORTANT NOTES ABOUT MIKO MAGNETS" enclosed in each box before use.

## SPECIFICATIONS

**HOLDING FORCE**  
90 KG

**FOOTPRINT**  
150 X 50 MM

**NET WEIGHT**  
1 KG

**GROSS WEIGHT (BOX)**  
4 KG

**DEPTH RATING**  
FULL OCEAN DEPTH

**QUANTITY IN BOX**  
1 PCS

The stated holding force refers to the perpendicular holding force when applied directly onto a clean mild steel plate of minimum thickness 6 mm.
