

SH-WB3010 Flip Controller

Description:

Used to improve the orientation of the metallic particles and the color effect, making particles sparkle stronger and the film softer.

Notes:

1. Dosage: Depends on the color effect, maximum 20%.
2. Usage requirements: After the binders/viscosity balancer/blending agent and basecoat are added, add the Flip Controller, stir evenly, and finally add the Viscosity Adjuster.
3. Storage Conditions/Shelf Life: Store at 5–30°C(41-86°F). Optimal conditions are in a cool, dry place at 23°C(73°F). Keep in original sealed container; shelf life is 24 months.
