@ 140°F  
Dust free: 10 mins  
Dry to Polish: 20 mins

## Re-application:

Areas with small particles or runs can be wet-sanded with 2000-grit sandpaper after complete hardening, followed by wax polishing.

## CLEARING:

Clean equipment immediately with solvent after application

**PHYSICAL DATA OF VOC:** 3.51 lb/gal

## NOTE:

1. When the temperature is below 41°F, air drying is not recommended. It is preferable to force dry at 140°F to shorten curing time.
2. Above 86°F, an appropriate amount of anti-blushing thinner may be added. Refer to its instructions for details.
3. If fisheyes appear during spraying, stop immediately. Add 0.5-1% anti-fisheye agent to the remaining paint before resuming.
4. Clearcoat mixed with hardener must be used promptly and cannot be stored for later use.
5. Clean all spraying equipment with thinner immediately after use to prevent hardened residue.
6. Storage: Keep at 41-95°F in the original sealed container. Shelf life: 2 years.
