Cut List

What do you plan to do with the lumber?

What species do you have?

How many logs of each species?

What is the average small end diameter?

Is support equipment needed for site preparation/log decking?

Be specific as possible in listing your thickness & width: the mill can be set to cut in increments of 1/32 of an inch!

Example: Do you want a full dimension 2” x 6” or do you want a standard dimension 1 5/8” x 5/8”?

Species	Thickness	Width	Length	Quantity
