

FOREVER LINKED PERMANENT JEWELRY

Maintaining the beauty and longevity of your permanent jewelry requires regular care and mindful practices. Below are some essential guidelines to help you preserve your cherished pieces

1. Regular Cleaning

- **Materials Needed:** Mild dish soap, warm water, a soft-bristled toothbrush, and a lint-free cloth.
- **Cleaning Steps:**
 1. Mix a few drops of mild dish soap with warm water in a bowl.
 2. Place your jewelry in the solution and let it soak for about 15 minutes.
 3. Gently scrub the jewelry with the soft-bristled toothbrush to remove dirt and oils.
 4. Rinse thoroughly under warm running water.
 5. Pat dry with a lint-free cloth.

For sterling silver pieces, using a jewelry polishing cloth can help remove tarnish and restore shine.

2. Avoid Harsh Chemicals

Exposure to chemicals such as chlorine, bleach, and certain cosmetics can damage your jewelry. To protect your pieces:

- Remove jewelry before swimming in chlorinated pools or using hot tubs.
- Apply lotions, perfumes, and hair products before putting on your jewelry to minimize exposure.
- Clean your jewelry promptly if it comes into contact with any harsh substances.

3. Mindful Wearing

While permanent jewelry is designed for continuous wear, it's essential to be cautious during certain activities:

- Engage in heavy lifting or rigorous physical activities with care to prevent potential damage.
- Be mindful of activities that could cause your jewelry to snag or pull, leading to breakage.

4. Storage Recommendations

Proper storage helps maintain your jewelry's condition:

- When not wearing your jewelry, store it in a clean, dry place away from direct sunlight.
- Use individual pouches or compartments to prevent pieces from scratching each other.

5. Regular Inspections

Periodically inspect your jewelry for signs of wear or damage

- Check for loose links, clasps, or any deformities.[e](#)
- If you notice any issues, consult a professional jeweler for assessment and repair.

6. Removal Guidelines

If you need to remove your permanent jewelry:

- Use household scissors to cut at the small jump ring, avoiding damage to the chain itself.
- For a non-permanent option, consider having a professional add a clasp to your piece.

By following these care instructions, you can ensure your permanent jewelry remains as stunning as the day you received it.
