

Bullion256 (BUL) — Tokenomics

- Algorithm: SHA-256
- Consensus: Proof-of-Work
- Block Time: 10 minutes
- Halving Interval: 210,000 blocks
- Difficulty Adjustment: 144 blocks (2× clamp)

Tail Emission:

Once block rewards fall below 1 BUL, the subsidy remains at 1 BUL indefinitely.

Distribution:

- No premine
- No ICO
- No private allocation
- All coins generated via mining

Supply Model:

Disinflationary with long-term tail emission to support ongoing network security.
