

INTEGRITY ROOF SYSTEM™

A complete approach to
long-lasting beauty
and performance.

A family of four is gathered around a tablet, looking at the screen with interest. The father, in the center, is smiling. The mother is on the right, holding a young child. Another child is on the left, looking at the tablet. They are in a bright, modern interior with large windows in the background.

So it's time to put a
new roof on your home.
Let us show you how the
CertainTeed Integrity
Roof System™ can help
you achieve long-lasting
beauty and performance.

Just flip through the following pages, and we'll show you the key elements of your new roof system.

START HERE

We start with the decking on your home, before we add the components of the Integrity Roof System.

Now that your roof deck is ready, the first step is to protect your home against wind-driven rain and ice dams.

WATERPROOFING UNDERLAYMENT

The first step in your defense against the elements. Self-adhering underlayment is installed at vulnerable areas of your roof to help prevent leaks from the wind-driven rain and ice dams.

The second step in protection is to fully cover the deck with a water-resistant layer.

WATER-RESISTANT UNDERLAYMENT

Provides a protective layer over the roof deck and acts as a secondary barrier against leaks.

We have the deck
protected, now it's time
to start installing shingles.
And to do that, we use
a Starter Shingle.

STARTER SHINGLES

Starter Shingles are the first course of shingles that are installed and designed to work in tandem with the roof shingles above for optimal shingle sealing and performance.

Now it's time to install
the CertainTeed shingle
in the style and color
that you have chosen.

SHINGLES

Choose from a variety of Good-Better-Best styles to complement any roof design and fit your budget.

In order for your roof
to last longer and your
home to be more
comfortable, it needs
to breathe.

VENTILATION

The roof that breathes is shown to perform better and last longer. Ridge Vents, in combination with Intake Vents or Soffit Vents, allow air to flow on the underside of your roof deck, keeping the attic cooler in the summer and drier in the winter.

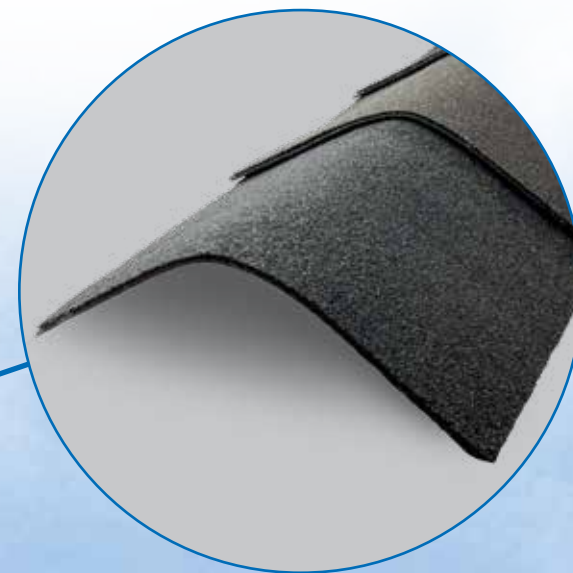

The shingles and ridge vents are installed, now it's time to cap them off with a distinctive finishing touch.

HIP & RIDGE CAPS

Available in numerous profiles, these accessories are used on the roof's hip and ridge lines for a distinctive finishing touch to your new roof.

And there you have it,
a beautiful new roof on
your home. Hopefully this
booklet on the Integrity
Roof System helped you
along the way.

Products that perform.
