Yellow Polyurethane cast over Heavy Duty Steel Rollers

Heavy Duty Steel Rollers

PROBLEM: REEL OVERLAP SHADOWING

SOLUTION: GOLFCO 3 SECTION MIXED SURFACE ROLLER

Multi-head mowers are designed with overlap positioning of the forward and rear reels causing double cutting of the turf that is typically visible as 2"-3" wide shadowing pathways or lines.

Golfco has developed an effective solution to this "double cut" shadowing as follows:

* We created a special front roller assembly for the rear mower heads. This roller assembly has three design sections on the body as follows: a grooved roller center section combined with short width smooth surface sections on each end. The smooth roller sections are aligned with the overlap of the forward and rear reels and function to lay down the grass just prior to the cut of the rear reel. This significantly minimizes the cut from the rear reel at the overlap end position, thereby eliminating or greatly reducing the shadowing lines inherent in the "double cut".

The multi-section roller aids in diminishing scuffing or sliding of the roller during turns. We have made this roller using our popular ultra tough polyurethane cast over a heavy duty steel roller base and our Competition Roller sealed bearing assembly for optimal life and utility.

We recommend use of our special multi-section front roller assembly in combination with our shortened rear roller. For optimal benefit, use our Competition polyurethane rollers on the forward mower heads. These roller assemblies are available to fit any fairway mower in complete sets or as individual rollers.

This product was initially tested at PGA National Golf Resort, Florida (home of the Honda Classic), in conjunction with the professional care of John Patterson using John Deere 8700D fairway mowers.

These special roller combinations are available for all brands and models of fairway rollers.

ROLLER LINES and OPTIONS:

Golfco makes rollers as significant upgrades to golf course reel and rotary deck mowers as follows:

Toro, Jacobsen, John Deere, Shibaura, Hustler, Ventrac (as listed here)
Ransomes, National, Bunton, Kesmac, Progressive Turf, Steiner, Brouwer, Baroness & more (call for details)

Also offering smoothing rollers for True-Turf golf greens rollers - Amazing Pricing Available

We can make almost any roller including rollers for aeration equipment. Many other diameters and models available

Competition Rollers™ (Full length shafts and sealed bearings)

ORIGINAL - Roller of choice for discerning professionals

- ★ Golfco has been making heavy duty, precision rollers exclusively for the golf & turf industry for 22 years. Our Competition Rollers™ were designed to accommodate almost any option of diameter, length and body style for any reel type and rotary deck mower used by golf courses and other discerning turf care professionals.
- ★ All of our Competition Rollers™ are made of heavy duty, precision steel tubing. We also produce polyurethane rollers. Polyurethane cast and bonded to steel provides exceptional high performance benefits unmatched by other materials. Polyurethane is a highly engineered elastomer similar to rubber but with far superior physical characteristics. Our cast polyurethane Competition Rollers™ provide exceptional wearability with abrasion resistance, toughness and shock absorbancy unmatched by other material choices. Your mowers will also benefit from the cushioning effect of polyurethane in rough, abusive environments.
- Polyurethane is exceptional at resisting debris buildup. It has no surface micro-pores (unlike metals). It resists absorption and adsorption of liquids and solids. Further, by resisting adherence of contaminants, our polyurethane rollers reduce the likelihood of contributing to transportation or transmigration of harmful microorganisms and diseases.
- Polyurethane is resistant to extremes in temperature. It will not get hot to the touch in sunny applications like metal and therefor will not sear or stress your turf. Also, it reflects cold and is resistant to frost.
- Competition Rollers™ incorporate a unique bearing, seal and shaft design that can be used in any application. All Competition Rollers™ utilize full length shafts and a bearing retainer system that is precise and reliable.
- No regreasing required the sealed single row ball bearings allow for ease of maintenance. The bearings are filled with a superior quality "EP" (extreme pressure) grease. We have added proprietary, unique additional seals for enhanced protection against the elements and for retaining grease within the housing to prevent leakage. A sealed bearing configuration that actually holds up to the toughest applications.
- 👱 Each roller is rebuildable quickly and affordably the proven success of Golfco's sealed bearing design is taken to the next level.
- * Stainless steel bearings are available as an upgrade upon request.
- An optional flush-mount grease fitting can be added that is fully protected against breakage within our proprietary exterior seal. This unique option allows for regreasing of the bearings at discretionary, customized intervals. Since the bearings remain sealed, you can regrease as often or little as you desire.
- w Our patented grooved rollers have soft large radius corners to protect the turf and provide steerability. No solid debris will ever lodge between the grooves of our polyurethane rollers. (US Patent 5394681)
- *** New sectional rollers with multiple independent roller bodies on a single shaft now available. An advantage for tight turn conditions or to avoid skid marks on cleanup pass with greens mowers.

Competition2 Rollers™ (with full length shafts and larger double row bearings)

NEW OPTION - If you have the toughest application on the planet

Golfco offers a significant enhancement to our proven line of Competition Rollers™.

Competition2 Rollers™ are upgraded to stainless steel double row sealed ball bearings.

- these heavy duty bearings have significantly higher load bearing capacity
- double row bearing sets have more than twice the lateral thrust capacity of tapered roller bearings
- these bearings have up to 2X the mass of the ones that we used successfully for over 20 years
- double row ball bearings require no adjustments or preloading no nuts or threaded shafts

(Please call to inquire about these Competition2 Rollers $^{\!\scriptscriptstyle\mathsf{TM}}$ available for many applications)

(Competition2 Rollers™ have a "2" in front of the part #)

Pro Roller™ line (Enhanced Golfco designs with water pump style bearings)

Precision machined rollers with simple replaceable water pump style bearings (with integral shafts). Most Pro rollers are machined grooved or smooth from one piece solid steel or aluminum bar. All light steel tubing roller bodies and bearing hubs are TIG welded full circumference to last longer.

Standard Roller™ line (Comparable to OEM style)

Golfco offers certain roller options that are visually similar to OEM style rollers. These rollers are produced and assembled to high precision standards. They are priced at or below any other manufacturers' comparable roller part.

ALL GOLFCO ROLLERS ARE MADE IN THE USA BY OUR OWN SKILLED MACHINISTS & TECHNICIANS

SUMMARY OF SPECIAL FEATURES

Advanced design for bearings, seals and retainers:

Customized sealed ball bearings.

Bearings are completely filled with highest quality extreme pressure (EP rated) grease.

Paired with special external seals for maximum life.

Stainless bearings available for extreme environmental conditions.

Special flush mount grease fittings are available (if you prefer to re-grease the bearings).

Adding grease fitting does not require frequent regreasing. Once or twice a year is typical.

Competition Rollers are heavy-duty, thick wall precision steel rollers:

All polyurethane covered rollers are made with 1.75" OD, thick wall, precision DOM steel tubing.

Machining tolerances are within .0002" for all bearing surfaces and features.

All production processes are supervised by skilled managers with over 60 years of experience.

Inspection of all components occurs four times prior to shipping.

High precision ensures lasting quality of all components and ease of rebuilding.

Full length shafts (increases integrity of the roller with less stress on body and bearings).

Polyurethane body material with features as follows:

Extreme performance elastomer that continues to cure and increase physical properties for years.

Precision cast (not a thin spray-on coating) over a heavy duty steel roller body.

Extremely wear and abrasion resistant (very tough).

Will far outlast any metallic material in abrasive conditions.

Completely impact resistant and dent proof.

100% memory rebound and returns to its original shape.

Highly shock absorbing thereby diminishing damage to mower from rough terrain.

Minimizes shake and shudder from the motor...reducing wear on joints and components.

Reduces fatigue and physical wear on mower operators.

Will not shred or fray like plastic materials.

Will not absorb liquids, swell, expand or shrink.

Will not damage concrete or asphalt paths or curbs from contact.

Silent running on all surfaces.

Polyurethane minimizes debris collection and buildup:

Is a "live" material that limits debris from clinging to the surface in dynamic rolling.

No micro-pore surface structure for adsorption of liquids.

Diminishes transmigration of harmful elements such as disease or fungus.

Polyurethane minimizes turf stress form thermal transfer:

Absorption of heat or cold in roller is minimal.

No turf stress from heat or cold transmission by roller contact.

Minimizes potential for frost buildup.

Grooved design features no parallel sides within the groove channels:

Eliminates hard debris from lodging in the grooves.

Provides more consistent, finer after-cut appearance.

Grooved design has large soft radius groove crests and no corners for gentle turf contact:

Minimizes surface area contact and ensures less compaction of the turf.

Rollers ride closer to the soil and prevent floating of mower head.

Ensures more consistent after-cut appearance.

Provides easier steering and turning of the mower.

Non-aggressive and less stressful on turf.

Allows for more grass to be cut on initial pass - saving time.

Competition Roller[™] Upgrade Options

\$23

\$66

\$20

\$63

Part #

Upgrade to Stainless Steel Bearings on Competition Rollers™

BU-COMPSS

Upgrade to Double Row Bearings as our Competition2 Rollers™

-upgrade select Competition Rollers[™] to double row bearings with black oxide finish (5203 style)

-available for most rollers > 2" diameter (requires specially machined inner steel tube bearing housings)

(designate by adding "2" to front of roller part number)

Add Grease Fittings (set of 2 special flush mount grease fittings)

-grease fittings (set of two) for new Competition Rollers $^{\text{TM}}$ or new overhaul kits

-special yellow end seal (set of two) to accommodate grease fitting without new bearing kits \$24

GFFD316SET 2SEAL16CUGF SET

2TOOLSET

OHCOMPNt

Bearing Installation Tool Set

-set of 2 tools - aids in installing bearings into roller housing and onto shaft

Super Duty solid one piece Polyurethane Soft Blow Mallet

-unique utility to add to your tool box

#MALLET1 \$58

Competition Roller[™] Overhaul Kits - *ORIGINAL STYLE*

OHCOMP Standard overhaul kit for all single body rollers (except "H" style 2" grooved) \$60 (with 2 alloy steel bearings, 6 seals, 2 stainless washers & 4 retainers) Stainless steel bearing overhaul kit for all single body rollers (except "H" style 2" grooved] \$83 **OHCOMPSS** (with 2 stainless bearings, 6 seals, 2 stainless washers & 4 retainers) Overhaul kit for new "H" style 2" dia. grooved rollers shipped after 9/26/19 ОНСОМРН \$60 (with 4 stainless bearings, 6 seals, 2 stainless washers & 4 retainers)

Overhaul kit for twin body roller assemblies (one kit per body - call to confirm Overhaul kit for 3 & 4 body roller assemblies (one kit per body - call to confirm) \$61 OHCOMPN4

Competition2 Roller[™] Overhaul Kits *SERIES 2* with Double-Row Bearings

Double-Row Bearings with corrosion resistant black oxide finish (5203-40mm OD) OHCOMP2BO

(with 2 bearings, 6 seals, 2 stainless washers & 4 retainers)

Only Golfco bearings are filled to over 90% with a special high performance extreme pressure rated grease

that has been time tested to maximize the life of the bearing for commerical mower applications.

Competition Roller[™] Shafts

ALL SHAFTS OFFERED AS ASSEMBLIES WITH OVERHAUL KITS (see roller price list pages above for shaft part numbers) REGULAR SHAFT ASSEMBLY WITH OHCOMP OVERHAUL KIT \$120 (see roller price list pages above for shaft part numbers)

REGULAR SHAFT ASSEMBLY WITH OHCOMPSS OVERHAUL KIT \$143 (see roller price list pages above for shaft part numbers) REGULAR SHAFT ASSEMBLY WITH OHCOMP2BO OVERHAUL KIT \$163 (see roller price list pages above for shaft part numbers) SHAFT ASSEMBLY FOR MULTIPLE BODY ROLLERS - CALL FOR SPECIFICS (see roller price list pages above for shaft part numbers)

SELECT SPECIAL SHAFT ASSEMBLIES - CALL FOR SPECIFICS

(The shaft part number is derived from the first 6 digits of the roller part number as follows: Roller T2522S2CGH has shaft part SHA2522ST)

For assemblies with STAINLESS STEEL bearings add "SS" to the end of overhual kit part #. add \$23

Pro Roller[™] Bearings (Water Pump Style)

Replaces Toro #21-8430 Water pump bearing-sealed (shaft is 1.8")	\$21	BWP3
Replaces Toro #52-3180 & 52-3210 Water pump bearing-sealed (shaft is 1.8" with 3/8-24 tap)	\$21	BWP4
Replaces Jacobsen #101482 Water pump bearing-sealed (shaft is 1.0* with 7/16-20 tap)	\$21	BWP5
Replaces Toro #75-1290, Jacobsen #101481 & John Deere #35741 Water pump bearing-sealed (shaft is 1.5")	\$21	BWP7

REBUILD INSTRUCTIONS

(For Overhaul Kits OHCOMP & OHCOMPSS & OHCOMPH)

All single body Competition Rollers™ are assembled with components in each roller end as follows:

Part / Description

REMOVAL OF USED COMPONENTS:

(Work on one end only "end A" for steps 1-6)

- * Remove the outer snap ring retainer.
- * Remove the steel washer (slides off end of shaft).
- * Remove the outer V seal (on shaft in counter-bore of collar seal).
- * Remove the yellow housing seal from the roller end housing (can be pried off).
- * Remove the inner V seal (located behind the collar seal).
- * Remove the snap ring retainer which is next to the bearing inner race. Use snap ring pliers.
- * Remove the shaft by pushing it through end "A" of the roller and out of end "B" (we use a soft hammer). Be careful to avoid damage or injury as the shaft leaves the roller body.
- * Remove all of the bearing, seal and retainer components from end "B" of the shaft.
- * Use the shaft to push the 2nd bearing out of end "A" of the roller body bearing housing.

REBUILDING ROLLER WITH NEW COMPONENTS:

(Overhaul kit # OHCOMP or OHCOMPSS contains 2 each of the components listed above)

- * Insert the shaft into the roller body.
- * Place new bearings onto the shaft ends.
- * Install the bearings into the bottom of each roller body bearing housing using Golfco bearing assembly tools (2TOOLSET40) or large sockets. The inner shoulders of the shaft will help to position the shaft roughly in the roller body but it will not be centered. The shaft has two grooves near each end. You should be able to see both grooves of one end of the shaft (shaft end "A").
- * Install one snap ring retainer onto the shaft at the inner groove that is visible (shaft end "A").
- * Carefully shift the shaft toward end "B" of the roller body until the installed inner snap ring retainer is seated against the bearing race (on end "A"). Do not force the shaft too far or the snap ring retainer will deform. Keep the bearings seated against the bottom of the roller body housing (the housing bottom shoulder) by using the bearing assembly tools. You should be able to see both retainer grooves on end "B" of the shaft.
- * Install the second snap ring retainer into the inner groove of the shaft at end "B".
- * Test that the shaft spins easily within the roller body. If not, lightly tap the shaft ends to reseat the bearings.
- * Push one of the V seals onto the shaft against the snap ring retainer with the thin flexible lip section facing outward in relation to the roller body. Repeat for the other end of the roller.
- * Optionally add a small amount of your favorite industrial grease into both bearing housings next to the bearings without filling into the V seal.
- * Install the yellow housing seal into the bearing housing counter-bore of the roller body with its counter-bore facing outward. The housing seal should fit snugly into the bearing housing counter-bore and be parallel to the roller body end.
- * Push the second V seal onto the shaft end with the thin flexible lip section facing inward. With careful motion, push the V seal down the shaft to the counter-bore of the yellow housing seal until the V seal outer face is flush with the outer face of the housing seal. May have to gently work the V seal past the grooves on the shaft. The V seal inner lips should be flared laterally and ride against the bottom face of the housing seal counterbore. Do not try to install the V seal between the shaft and the inside diameter surface of the housing seal.
- * Install the steel washer and the exterior snap ring retainer. The steel washer should be loose fitting.
