manufactured in Redmond, WA

Yellow Polyurethane cast over Heavy Duty Steel Rollers™

## **Heavy Duty Steel Competition Rollers™**

PROBLEM: REEL OVERLAP SHADOWING

SOLUTION: GOLFCO 3 SECTION MIXED SURFACE ROLLER

Multi-head mowers are designed with overlap positioning of the forward and rear reels causing double cutting of the turf that is typically visible as 2" - 2.5" wide shadowing pathways or lines.

## Golfco has developed an effective solution to this "double cut" shadowing as follows:

\*

We created a special front roller assembly for the rear mower heads. This roller assembly has three independent rolling body sections as follows: a grooved roller body center section combined with short width smooth surface roller bodies on each end. The smooth roller bodies are aligned with the overlap of the forward and rear reels and function to lay down the grass just prior to the cut of the rear reel. This significantly diminishes the ability of the rear reel to cut the turf at the overlap position, thereby <u>eliminating or greatly reducing the shadowing lines</u> inherent in the "double cut".

The multi-section independent rolling bodies aid in preventing scuffing or sliding of the roller during turns. We have made this roller using our popular ultra tough polyurethane cast over a heavy duty steel roller base and our Competition Roller sealed bearing assembly for optimal life and utility.

We recommend use of our special multi-section front roller assembly in combination with our shortened rear roller. For optimal benefit, use Competition polyurethane rollers on the forward mower heads. These roller assemblies are available to fit any fairway mower in complete sets or as individual rollers.

This product was initially tested at PGA National Golf Resort, Florida (home of the Honda Classic), in conjunction with the professional care of John Patterson using John Deere 8700D fairway mowers.

\*These special roller combinations are available for all brands and models of fairway rollers.\*

### Golfco makes rollers as significant upgrades to golf course reel and rotary deck mowers as follows:

Toro, Jacobsen, John Deere, Shibaura, Hustler, Ventrac (as listed here)

Ransomes, National, Bunton, Kesmac, Progressive Turf, Steiner, Brouwer, Baroness & more (call for details)

Also offering smoothing rollers for True-Turf golf greens rollers - Amazing Pricing Available.

We can make almost any roller including rollers for aeration equipment. Many other diameters and models available

#### **ROLLER LINES and OPTIONS:**

## Competition Rollers™ (Full length shafts and sealed bearings)

\*ORIGINAL\* -Roller of choice for discerning professionals

- ★ Golfco has been making heavy duty, precision rollers exclusively for the golf & turf industry for 22 years. Our Competition Rollers™ were designed to accommodate almost any option of diameter, length and body style for any reel type and rotary deck mower used by golf courses and other discerning turf care professionals.
- All of our Competition Rollers™ are made of heavy duty, precision steel tubing. We also produce polyurethane rollers.

  Polyurethane cast and bonded to steel provides exceptional high performance benefits unmatched by other materials.

  Polyurethane is a highly engineered elastomer similar to rubber but with far superior physical characteristics. Our cast polyurethane Competition Rollers™ provide exceptional wearability with abrasion resistance, toughness and shock absorbancy unmatched by other material choices. Your mowers will also benefit from the cushioning effect of polyurethane in rough, abusive environments.
- Polyurethane is exceptional at resisting debris buildup. It has no surface micro-pores (unlike metals). It resists absorption and adsorption of liquids and solids. Further, by resisting adherence of contaminants, our polyurethane rollers reduce the likelihood of contributing to transportation or transmigration of harmful microorganisms and diseases.
- Polyurethane is resistant to extremes in temperature. It will not get hot to the touch in sunny applications like metal and therefor will not sear or stress your turf. Also, it reflects cold and is resistant to frost.
- Competition Rollers™ incorporate a unique bearing, seal and shaft design that can be used in any application. All Competition Rollers™ utilize full length shafts and a bearing retainer system that is precise and reliable.
- No regreasing required the sealed single row ball bearings allow for ease of maintenance. The bearings are filled with a superior quality "EP" (extreme pressure) grease. We have added proprietary, unique additional seals for enhanced protection against the elements and for retaining grease within the housing to prevent leakage. A sealed bearing configuration that actually holds up to the toughest applications.
- Each roller is rebuildable quickly and affordably the proven success of Golfco's sealed bearing design is taken to the next level.
- \* Stainless steel bearings are available as an upgrade upon request.
- An optional flush-mount grease fitting can be added that is fully protected against breakage within our proprietary exterior seal. This unique option allows for regreasing of the bearings at discretionary, customized intervals. Since the bearings remain sealed, you can regrease as often or little as you desire.
- Our patented grooved rollers have soft large radius corners to protect the turf and provide steerability. No solid debris will ever lodge between the grooves of our polyurethane rollers. (US Patent 5394681)
- \*\*\* New sectional rollers with multiple independent roller bodies on a single shaft now available.

  An advantage for tight turn conditions or to avoid skid marks on cleanup pass with greens mowers.

## Competition2 Rollers™ (with full length shafts and larger double row bearings) \*NEW OPTION\* - If you have the toughest application on the planet

Golfco offers a significant enhancement to our proven line of Competition Rollers™.

Competition2 Rollers™ are upgraded to stainless steel double row sealed ball bearings.

- these heavy duty bearings have significantly higher load bearing capacity
- double row bearing sets have more than twice the lateral thrust capacity of tapered roller bearings
- these bearings have up to 2X the mass of the ones that we used successfully for over 20 years
- double row ball bearings require no adjustments or preloading no nuts or threaded shafts

(Please call to inquire about these Competition2 Rollers™ available for many applications)

(Competition2 Rollers™ have a "2" in front of the part #)

#### Pro Roller™ line (Enhanced Golfco designs with water pump style bearings)

Precision machined rollers with simple replaceable water pump style bearings (with integral shafts). Most Pro rollers are machined grooved or smooth from one piece solid steel or aluminum bar. All light steel tubing roller bodies and bearing hubs are TIG welded full circumference to last longer.

### Standard Roller™ line (Comparable to OEM style)

Golfco offers certain roller options that are visually similar to OEM style rollers. These rollers are produced and assembled to high precision standards. They are priced at or below any other manufacturers' comparable roller part.

ALL GOLFCO ROLLERS ARE MADE IN THE USA BY OUR OWN SKILLED MACHINISTS & TECHNICIANS

## SUMMARY OF SPECIAL FEATURES

#### Common overhaul kit for all rollers (bearings, seals and retainers are the same).

Sealed ball bearings that last without the need for re-greasing.

Stainless bearings available for special situations.

Can add special flush mount grease fitting (if you want to re-grease the bearings).

#### Made with heavy duty, thick wall precision steel tubing.

Full length shafts (increases integrity of the roller with less stress on body and bearings).

### Polyurethane body material with features as follows:

Is a high performance elastomer.

Is precision cast (not a thin layer spray-on) over a heavy duty steel roller body.

Is extremely abrasion resistant (very tough).

Will far outlast any metallic material in abrasive conditions.

Will not damage concrete or asphalt paths or curbs from contact.

Is silent running on all surfaces.

Is very shock absorbing and impact resistant.

Diminishes effects of impact and shudder to the mower-reducing wear on joints & components.

Will help diminish fatigue and physical wear on mower operators.

Has memory rebound and returns to its original shape.

Is a "live" material and shakes debris from the surface in dynamic rolling.

Has no micro-pore structure (liquids have no place to cling-resists adsorption).

Resists debris buildup (superior to any metallic materials).

Diminishes transmigration of harmful elements such as disease or fungus.

Absorption of heat or cold is minimal.

Does not transmit heat or cold.

Will not stress your turf in hot or cold conditions.

Will not develop frost buildup.

Continues to cure and increase physical properties for years.

### Grooved design features no parallel sides within the groove channels.

Prevents hard debris from lodging in the grooves.

Is non-aggressive and kinder on turf and provides more consistent, finer cutting

### Grooved design has large soft radius groove crests and corners for gentle turf contact.

Minimizes surface area contact and rides closer to soil.

Ensures less floating and less compaction of the turf.

Ensures more consistent cut appearance.

Provides for less stress and easier steering of the mower.

Will cut more grass on initial pass saving time.

Competition Roller™ Upgrade Options	Retail	Part #
Upgrade to Stainless Steel Bearings on any Competition Roller™	\$ 20	BU-COMPSS
Upgrade to Double Row Stainless Bearings as our Competition2 Rollers™ upgrade select Competition Rollers™ to double row stainless bearings (5203 style) available for most rollers larger than 2" diameter (requires special bearing housings)	\$ 60	(designate by adding "2" to fr roller part number)
Add Grease Fittings (set of 2 special flush mount grease fittings) can be added to the yellow end seal of any Competition Roller™ at any time	\$ 13	GFFD316SET
Bearing Installation Tool Set set of 2 tools - aids in installing bearings into roller housing and onto shaft	\$ 60	2TOOLSET
Super Duty solid one piece Polyurethane Soft Blow Mallet Everyone that has tried this mallet: "Thank you!!"	\$ 50	#MALLET1

### Competition Roller™ Overhaul Kits - \*ORIGINAL STYLE\*

Hardened Alloy Steel Bearing Overhaul Kits
(with 2 bearings, 6 seals, 2 stainless washers & 4 retainers)

Stainless Steel Bearing Overhaul Kits
(with 2 stainless bearings, 6 seals, 2 stainless washers & 4 retainers)

Stainless Steel Bearings (for upgraded rollers with 4 bearings)
(with 4 stainless bearings, 6 seals, 2 stainless washers & 4 retainers)

\$\text{\$110}\$ OHCOMP4BSS

For Multiple Body Rollers - call for overhaul kits

## Competition2 Roller™ Overhaul Kits \*SERIES 2\* with Double-Row Bearings

Double-Row Stainless Bearing Kit (5203-40mm OD) \$ 90 OHCOMP2SS

(with 2 stainless bearings, 6 seals, 2 stainless washers & 4 retainers)

Only Golfco bearings are filled to 90%+ with a special high performance extreme pressure rated grease that has been time tested to maximize the life of the bearing for commercial mower applications.

## **Competition Roller™ Shafts**

ALL SHAFTS NOW OFFERED AS ASSEMBLIES WITH OVERHAUL KITS	(	call for part numbers)
SHAFT ASSEMBLY WITH OHCOMP OVERHAUL KIT	\$ 100	
SHAFT ASSEMBLY WITH OHCOMPSS OVERHAUL KIT	\$ 120	
SHAFT ASSEMBLY WITH OHCOMP2SS OVERHAUL KIT	\$ 140	
SHAFT ASSEMBLY FOR MULTIPLE BODY ROLLERS - CALL FOR SPECIFICS		

(The shaft part number is taken from the roller part number as follows: Roller T2522S2CG has shaft part SHA2522ST) (For assemblies with STAINLESS STEEL bearings add "S" to the shaft part number.)

## Pro Roller™ Bearings (Water Pump Style)

Replaces Toro #21-8430	\$ 18	BWP3
Water pump bearing-sealed (shaft is 1.8")		
Replaces Toro #52-3180 & 52-3210	\$ 18	BWP4
Water pump bearing-sealed (shaft is 1.8" with 3/8-24 tap)		
Replaces Jacobsen #101482	\$ 18	BWP5
Water pump bearing-sealed (shaft is 1.0" with 7/16-20 tap)		
Replaces Toro #75-1290, Jacobsen #101481 & John Deere #35741	\$ 18	BWP7
Water pump bearing-sealed (shaft is 1.5")		

## **GOLFCO INTERNATIONAL COMPETITION ROLLERS™ 2018** REBUILD INSTRUCTIONS

(For Overhaul Kits OHCOMP & OHCOMPSS)

All Competition Rollers<sup>™</sup> are assembled with components in each roller end as follows:

#### Part / Description

2RET62SR Retainer Snap Ring (exterior) >>>>>>>>

2SEAL62V Seal Shaft V - outer (black rubber) >>>>>

2SEAL16CU Housing Seal (yellow polyurethane) >>>>

2SEAL62V Seal Shaft V - inner (black rubber) >>>>>

2RET62SR Retainer Snap Ring (exterior) >>>>>>>>

(option) 2BCOMPSS Sealed Bearing (stainless) >>>>>

#### REMOVAL OF USED COMPONENTS:

(Work on one end only "end A" for steps 1-6)

- Remove the outer snap ring retainer.
- 2. Remove the steel washer (slides off end of shaft).
- 3. Remove the outer V seal (on shaft in counter-bore of collar seal).
- 4. Remove the yellow collar seal from the roller end housing (can be pried off).
- 5. Remove the inner V seal (located behind the collar seal).
- 6. Remove the snap ring retainer which is next to the bearing inner race. Use snap ring pliers.
- Remove the shaft by pushing it through end "A" of the roller and out of end "B" (we use a soft hammer). Be careful to avoid damage or injury as the shaft leaves the roller body.
- 8. Remove all of the bearing, seal and retainer components from end "B" of the shaft.
- 9. Use the shaft to push the 2<sup>nd</sup> bearing out of end "A" of the roller body bearing housing.

#### REBUILDING ROLLER WITH NEW COMPONENTS:

(Overhaul kit # OHCOMP or OHCOMPSS contains 2 each of the components listed above)

- Insert the shaft into the roller body.
- 2. Place new bearings onto the shaft ends.
- Install the bearings into the bottom of the roller body bearing housings using Golfco bearing assembly tools (2TOOLSET40) or large sockets. The inner shoulders of the shaft will help to position the shaft roughly in the roller body but it will not be centered. The shaft has two grooves near each end. You should be able to see both grooves of one end of the shaft (shaft end "A").
- 4. Install one snap ring retainer into the inner groove of the shaft end that is visible (shaft end "A").
- Carefully shift the shaft toward end "B" of the roller body until the installed inner retainer is seated against the bearing race (on end "A"). Do not force the shaft too far or the snap ring retainer will deform. Keep the bearings seated against the bottom of the roller body housing by using the bearing assembly tools. You should be able to see both retainer grooves on end "B" of the shaft.
- 6. Install the second snap ring retainer into the inner groove of the shaft at end "B".
- 7. Test that the shaft spins easily within the roller body. If not, lightly tap the shaft ends to reseat the bearings.
- 8. Push one of the V seals onto the shaft against the snap ring retainer with the thin flexible lip section facing outward in relation to the roller body. Repeat for the other end of the roller.
- 9. Optionally add a small amount of your favorite industrial grease (not erotic) into both bearing housings next to the bearings without filling into the V seal.
- Install the yellow housing seal into the bearing housing counter-bore of the roller body with its side hole facing outward. The housing seal should fit snugly into the bearing housing counter-bore and be parallel to the roller body end.
- 11. Push the second V seal onto the shaft end with the thin flexible lip section facing inward. With careful motion, push the V seal down the shaft to the counter-bore of the yellow housing seal until the V seal outer face is flush with the outer face of the collar seal. The V seal inner lips should be flared laterally and ride against the face of the collar seal. Do not try to install the V seal between the shaft and the inside diameter surface of the hosuing seal.
- 12. Install the steel washer and the exterior snap ring retainer. The steel washer should be loose fitting.
