Specialists in Expansion Joint Treatment Solutions

About Us

Ankit Polymers is a flagship company under the O.P. Yadav Group. A trusted name in the field of specialty polymer sheet manufacturing since 1990. Headquartered in Gurugram, India, the group pioneered the domestic production of Uni-axially Oriented Nylon 6 sheets and has since expanded its product portfolio to include EVA anti-slip liners, medical tourniquets, and TPE-based construction tapes. Established in 1997, Ankit Polymers began offering Expansion Joint Treatment Services in 2015, and today, we are proud to be associated with India's most reputable architects, builders, and contractors—serving both government and private sector projects across the country.

Comprehensive Expansion Joint Services

1. Expansion Joint Systems for New Construction

Tailor-made solutions based on structural movement, load dynamics, and environmental factors. Use of premium, imported materials including: Aluminium cover plates TPE tapes High-performance adhesives and sealants Seamless detailing with surrounding waterproofing and flooring systems for a clean and professional finish. Ideal for basements, podiums, industrial slabs, corridors, and roof slabs.

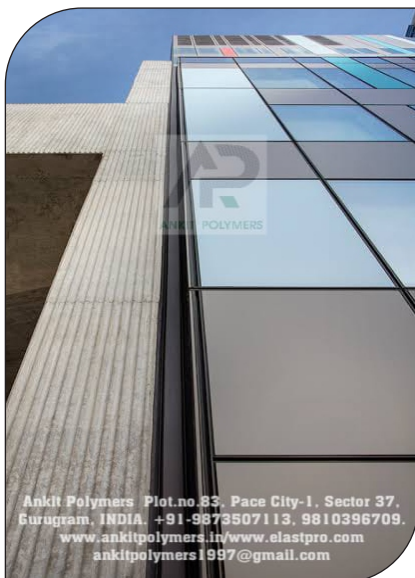

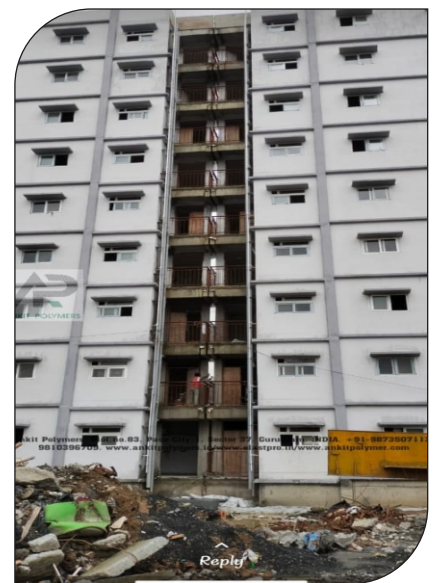

2. Rehabilitation of Aging or Damaged Joints

Detailed site evaluation and technical diagnosis of failed expansion joints. Removal of outdated or leaking systems and installation of updated, durable systems with flexible movement capacity. Advanced waterproofing and sealing systems to prevent water ingress, corrosion, or joint cracking. Restoration designed to meet modern compliance and functional needs.

3. Turn key Design & Execution

Full-scope project management: from site survey, system design, and material supply to final installation. Technical engineering support to ensure compatibility with movement joints, flooring types, vehicular or pedestrian traffic, and climatic conditions. Customized systems for malls, airports, hospitals, data centers, parking structures, logistics hubs, and more.

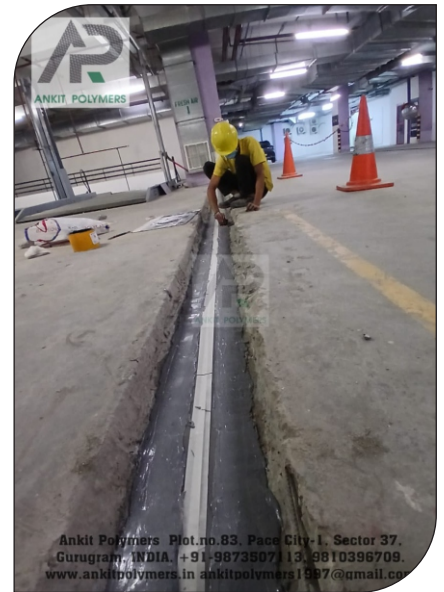

4. Architectural Finishing & Integration Systems

That balance functionality and aesthetics, preserving architectural intent. Compatibility with natural stone, tile, epoxy, vinyl, and other surface finishes. Sleek, low-profile covers and concealed profiles for clean interior and exterior applications. Solutions for both horizontal (floors, terraces) and vertical (walls, facades) joints.
