

AWEI TPO GEOTEXTILE BACKED WATERPROOFING SHEETS

100% PURE VIRGIN TPO

✓ Not a cheap rubberised polymer sheet with only a thin TPO coating on top.

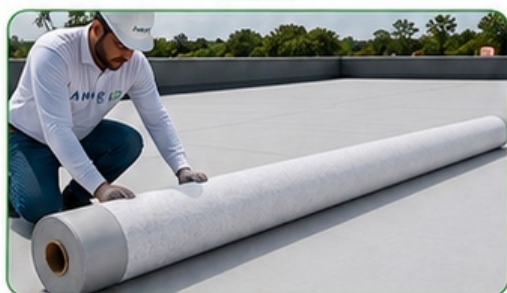

AWEI uses pure virgin TPO throughout the waterproofing layer for superior durability and long-term performance.

AWEI TPO Geotextile Backed Waterproofing Sheets are high-performance, heat-weldable, single-side geotextile backed thermoplastic polyolefin waterproofing membranes designed for long-lasting protection of new and existing roofs, podiums, balconies, terraces and below-ground waterproofing areas.

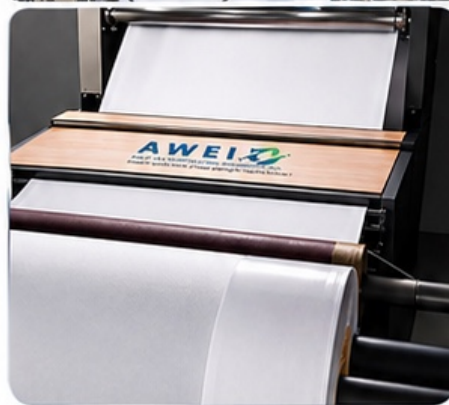

KEY FEATURES & BENEFITS

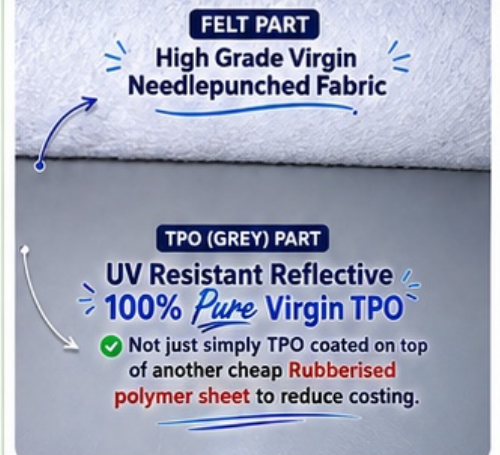

- 100% pure virgin TPO waterproofing layer throughout the membrane
- Single-side geotextile backing for strong substrate adhesion
- Heat-weldable plain TPO overlap edges for watertight jointing
- 1800 mm total width with 1600 mm reinforced bonding area and 100 mm unlaminated TPO edge on both sides
- Excellent UV, ozone and weather resistance
- High puncture, tear and breaking strength
- Reflective surface helps reduce heat absorption
- Designed for up to 30 years service life, subject to proper installation and site conditions

BUILT WITH PRECISION. DELIVERED WITH QUALITY.

ROLL CONSTRUCTION DETAILS

PACKING

- Roll Size: 1.8 Mtrs × 20 Mtrs
- Roll Area: 36 sq. mtrs
- Thickness: 1.5 mm
- Colour: Reflective Grey / White TPO Surface with Geotextile Backing
