My dream was to have more work-life balance and be able to spend more time with my family, but as a pediatric advanced practice nurse, I spent most of my waking hours with other babies instead of my own. As an ENVP, my Arbonne business has fulfilled that dream, which is something money can't buy!

Growing up, I didn't feel like I belonged. But when people are united like they are in the Arbonne community, we are able to see past the superficial to appreciate each other's differences and come together toward a common purpose. At Arbonne, my goal is to make the world a better place through healthy living and a positive mindset. My background in biomedical engineering designing medical devices used to be my primary vehicle for helping others, but now, my Arbonne business has allowed me to take that passion to the next level.

I have gone down many career paths, from professional makeup artist to human resources specialist to running several businesses. But Arbonne has been more than a business opportunity — it's been my calling. Our amazing nutrition products not only helped with my wellness goals, but instilled in me a passion for helping others.

The defining moment in my journey was when I finally learned to connect my love of nutrition and fitness to my Arbonne business. When you step in to your truth and be yourself, it becomes easier. And thanks to an incredible community of positive friends, that unconditional support has taught me to have the sort of inner confidence that allows me to show off my best, most genuine self to the world.
