# Introducing Managed Area Phone Service (MAPS™)

MAPS™ is your complete solution to provide phone service to your residents by taking advantage of commercial (bulk) voice / data pricing and reselling to your residents. You own the facility, you own the wiring, now you can own the system that allows you to increase your revenue while providing a higher value service to your residents. Managed Area Phone Service™ from Allied Technologies.

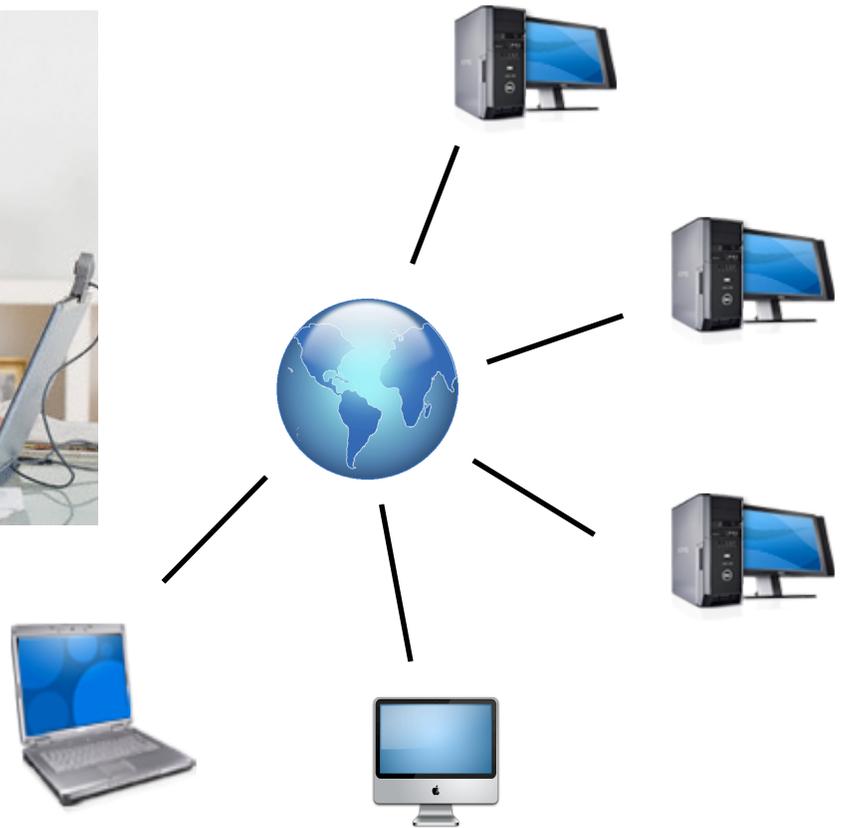

## Benefits for the Residents:

- ✓ Lower phone bills
- ✓ Quality phone service
- ✓ Phone service the day you move in
- ✓ Payment to one source (can be combined with rent)
- ✓ Same phone number as your current phone
- ✓ Internal communication with Administration staff

## Benefits for Facility:

- ✓ Added on-going revenue source
- ✓ Fast ROI
- ✓ Additional benefits for residents increases loyalty
- ✓ State-of-the-art phone system for your business/ administrative office
- ✓ Control of phone service within your facility
- ✓ Assistance in marketing to your residents
- ✓ Minimal management required

## Always On Internet™ (AOI™)

### Always On Internet™ (AOI™)

Increase resident loyalty by providing quality Internet service for less than market prices. And the biggest benefit... It's always on!

Many seniors have only experienced dial-up service making it inconvenient for them to tap into this great technology we all take for granted.

Imagine offering your residents the capability of:

- ✓ Regularly email contact with their relatives
- ✓ Researching questions on topics like medicine, symptoms, hobbies, and news
- ✓ Enjoying news, podcasts, music and shopping 24/7

## ALLIED TECHNOLOGIES ONLINE, INC.

Other senior living facilities are currently enjoying the benefits of Managed Area Phone Service™ and your business can too!

Here's how it works...

1. Information is gathered regarding current phone numbers and other programming needs.
2. Allied Technologies will install a new phone system that serves both your residents as well as your office staff in most cases using your current wiring.
3. Allied Technologies provides the appropriately sized Voice and Data circuits to your facility.
4. Communicate change to your residents emphasizing the benefits (most will not notice any difference other than reduced cost)
5. Schedule switchover during evening hours when phone activity is low.

Enjoy the benefits of your new system!
