

Audit and Review Services

Routine financial audits and reviews are a crucial business practice and are utilized by business management, stakeholders, investors, government entities, and financial institutions for assuring that financial statements are fairly presented and free from material misstatements.

An audit or review by an independent Certified Public Accountant provides a trusted means for determining whether your financial statements are in compliance with applicable generally accepted accounting principles (GAAP), international financial reporting standards (IFRS), and special purpose frameworks.

Audited or reviewed financial statements provide credibility for an entity. They also provide stakeholders and investors greater confidence and comfort in working with your business.

Whether you're an owner or manager of a small or medium size business, or a leader of a multinational organization, your business can benefit from each of the following audit and assurance review services provided by our independent Certified Public Accountant firm:

- Financial statement audits
- Financial statement reviews
- Examination or review of subject matter or assertions
- Providing agreed-upon procedures on subject matter or assertions
- Assessment of internal accounting and reporting controls
- Compilation of financial statements
- Presentation of financial statements
- Audit and review of government contractors
- IRS, State Tax, GAAP or IFRS compliance
