# BLUEBELL

### COLORING GUIDE

- Petals: The most common color for bluebells is a vibrant violet-blue. However, they can also come in shades of pink, purple, and white.
- Stem: Color the stem a vibrant green.
- Leaves: Are a medium to deep green.

### HOW TO GROW

Plant bluebell bulbs in the fall in well-drained, shady spots. Then, let nature take its course. They'll multiply and create a beautiful carpet of color with minimal work.
