## Learn Illinois Easy to Grow Flowers

# ZINNIA

### COLORING GUIDE

Zinnias come in a huge range of colors! You can choose from red, orange, yellow, pink, purple, magenta or pastel shades of light pink, cream, pale yellow, lavender and even multicolored. The center (disk florets) are yellow or orange. The stem and leaves are medium to deep green.

### HOW TO GROW

Pick a sunny spot that gets 6 to 8 hours of sunlight each day, with loose, well-draining soil. Plant zinnia seeds about 1/4 inch deep after the last frost. They need about an inch of water per week but can handle some drought. When a flower fades, snip it off below the head to help the plant bloom more.
