

Title: VLC Player Installation Exercise

Description: This practical scenario guides participants through the process of installing VLC Player, a versatile multimedia player, from the official website. VLC Player is known for its wide range of supported formats and features, making it a popular choice for playing audio and video files.

Purpose: The purpose of this scenario is to equip participants with the skills to independently download and install software from an official website. This exercise emphasizes the importance of obtaining software from reliable sources and ensuring a secure installation process.

Steps:

❖ **Step1:** Navigate to VLC Player Official Website

Open a web browser

- Launch your preferred web browser on your computer.

Enter the VLC Player website

- In the address bar, type or copy-paste the following URL: <https://www.videolan.org/vlc/>
- Press "Enter" to go to the VLC Player official website.

❖ **Step2:** Download VLC Player

Locate the download button

- On the VLC Player website, find the download button. This is usually prominently displayed on the main page.

*** Choose the appropriate version**

- Identify your operating system (Windows, macOS, or Linux).
- Click on the corresponding download button for your operating system.

Note: Some websites may auto-detect your OS and system type. So, "Choose the appropriate version" may be optional.

❖ **Step3:** Install VLC Player

Open the downloaded file

- Locate the downloaded VLC Player installation file on your computer.
- Double-click on the file to initiate the installation process.

Follow the installation wizard

- The installation wizard will guide you through the process.
- Review and accept the terms and conditions if prompted.
- Choose the installation options as per your preference.

Complete the installation

- Click "Install" to start the installation process.
- Wait for the installation to complete.
- Once finished, you may be prompted to launch VLC Player immediately.

❖ **Step4:** Verify VLC Player Installation

Open VLC Player

- Locate the VLC Player icon on your desktop or in your applications folder.
- Double-click on the icon to open VLC Player.

Play a media file

- Test VLC Player by playing a video or audio file.
- Ensure that the media file plays without any issues, confirming a successful installation.
