

Title: Learning About Places Where Computers Are Used

Description: This practical will help students understand where computers can be found and used.

Purpose: The purpose of this exercise is to help students recognize where computers are used, such as in schools, homes, offices, and hospitals.

Understanding these environments helps students appreciate the role of computers in everyday life and lays the groundwork for learning more about how computers function and their importance.

Steps:

1. Open a web browser:

- Turn on the computer and open any one of the following web browser.

Google Chrome

Microsoft Edge

Mozilla Firefox

2. Open Google Search engine:

- Go to www.google.com.

3. Search for school computer:

- In the search bar, type "school computer" and press Enter.

4. Check school computer images:

- Click on the "Images" tab to see pictures of computers used in schools.

5. Computer helps us learn in school:

- Show a picture of a school computer and say, "This is a school. Computers help us learn here."

6. Search for home computer:
