

Title: Make your desktop beautiful

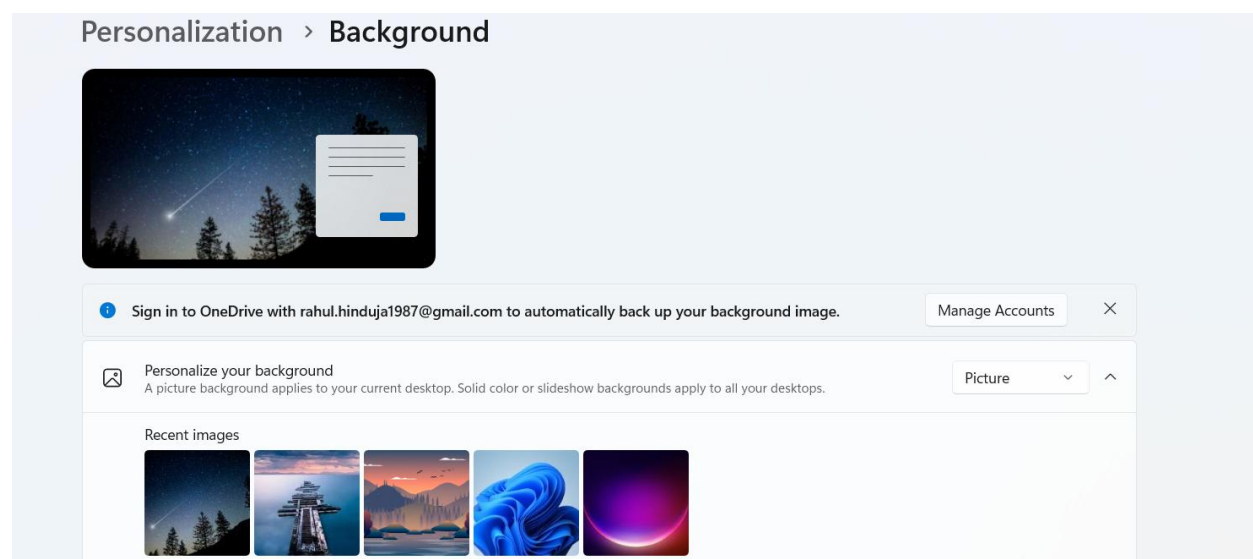

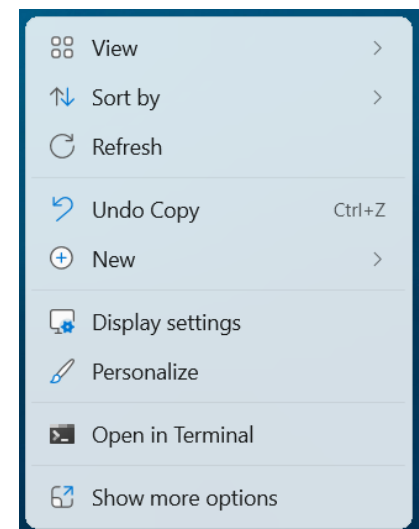

Description: In this activity, students will learn how to change the picture on their desktop (wallpaper). The desktop background is the image that appears behind the icons on the screen.

Purpose: The purpose of this activity is to help students personalize their computer by choosing a new desktop background. This makes them familiar with the **right-click menu** and **Personalization settings**.

Requirements: Computer with Windows OS, mouse & Keyboard.

Steps:

1. Go to the **desktop screen** (home screen with icons).
 - Make sure no program window is open
2. **Right-click** on an empty space of the desktop.
 - A menu will appear.
3. From the menu, click on **Personalize**.
 - The Settings window will open.
4. In the menu, click on **Background** (if not already selected).
 - You will see options to change your desktop picture.
5. Under **Background**, click the drop-down box and choose **Picture**.

6. Select one of the built-in pictures shown.
 - The preview will change to show your chosen picture.
 - The desktop background will immediately change.
7. Minimize the Settings window to see your new desktop.
8. If you want, try another picture and see the change again.

Expected Output:

- Students will be able to change their desktop wallpaper to one of the built-in pictures.
- Each computer will show a different background chosen by the student.

Important Note:

- Use only built-in images. Do not download pictures from the internet at this stage.
- If the background option looks different on some computers, use the **search box in Settings** and type “Background.”
