I would highly recommend the Contagion Control's ULV Cold Fogger. Since using the fogger along with the HOCl Surface Cleanser we have cut our cleaning and disinfecting time in half. We can provide a Clean disinfectant to our community with no harmful and hazardous chemicals while still effectively meeting The Covid-19 disinfectant guidelines. Our members feel confident in their work environment and we can Promote this as we are selling our event and office space, and we were able to book an event here at Hexa due to the new ULV Fogger and surface cleaning and disinfecting system.

Regards,

Carolyn Helt
Hexa Community Manager
