

Job Description – Industrial Abatement Tech

About Stutters Restorations

Stutters Restorations is a full-service restoration contractor specializing in insurance repair. Stutters was started as a small family business over 40 years ago and has grown to 6 offices throughout the south-central Interior of BC. Stutters has successfully completed every kind of restoration work imaginable; hospitals, schools, stores, restaurants, factories, libraries, laboratories, barns, apartment complexes, and private homes. We provide the highest standards of integrity, workmanship, and service by using the latest equipment and technology, and the most skilled individuals. At Stutters, we place an emphasis on our employees' happiness, job satisfaction and success, and pride ourselves on our collaborative company culture.

Summary

An Industrial Abatement Technician is responsible for removing hazardous materials from industrial buildings, equipment, and structures. They are responsible for ensuring that the work area is safe and free of hazards. They ensure that all hazardous materials are disposed of properly. The job requires awareness of industrial procedures, safety protocols, a level of physical fitness, and the ability to work in confined spaces.

Job Duties
