Mr. Anderson-

I have attempted to contact you via phone regarding the allegations and statements that Attorney Clapham claims you have made in her attached motion, however have not received any calls back. As I am a pro se litigant and such allegations are being made, per the Rhode Island Bar Association it is my right to be able to speak with you regarding the statements Attorney Clapham claims you have made. Since the allegations she made are untrue and what she is saying transpired is not the truth of the situation, I believe that you and I should have a conversation regarding the statement she claims that you made.

The judge who was overseeing our case agrees with my many motions that alienation is occurring, that the school has now assisted in such, and has moved our case to a magistrate and assigned a guardian ad litem. The judge has assured me that I do have the right to pick my child up from school for doctor's appointments. And per the school district website, any party is welcome to attend all parts of the school board meetings.

I look forward to the opportunity to speak with you.

David & Mary Parker
