

Car Top Selector Systems

For New Construction and Modernization

INSTALL KIT INCLUDES:

- Sensor
- Frame & Mounting Hardware
- Cable
- Steel Tape
- Magnets
- Lane Template
- Schematic

STANDARD FEATURES:

- A tape head reads magnets attached to steel tape, signaling the controller for leveling, door zone, and slowdown.
- LED indicators for all signals are located on the back of the sensor head.
- All field connections are made in the power supply box.
- The contacts for output signals are rated for 10A at 250V.

OPTIONAL FEATURES:

- 15", 30", or 45" Sensor Channels
- Sensors for Steel or Stainless Tape
- 2" or 4" Wide Tape
- North & South Pole Magnets
