Entering the Time of Ascension **Shamballa 2024-2025**

A unique study for students of the I AM America Teachings with Saint Germain and the Ascended Masters during the annual opening of Shamballa.

A Six-Week Study of the Evolutionary Biome

This year, we will revisit the extraordinary teachings of Evolutionary Biome, a transformative series originally released during the 2019-2020 Shamballa Season. Comprising twenty profound lessons, this collection stands as one of the finest from the Ascended Masters, offering deep insights into the Shamballa Season and the extraordinary City of White. These teachings delve into esoteric concepts such as reincarnation, the transformative fires of human physiology, and guided journeys with Saint Germain through the magnificent Temples of Shamballa. Through vivid imagery and detailed instruction, the series introduces the concept of the Evolutionary Biome—a dynamic, living landscape that calls for your HU-man development and multidimensional perspective.

As with all I AM America teachings, these lessons first engage the feeling world. As you listen to each lesson, you will sense its subtle energies and layered nuances, which gently prepare your Mental Body to receive the teachings more deeply. This process is further enriched when you read along in the companion book, *Evolutionary Biome*, enabling a harmonious integration of spiritual wisdom into physical activity. This sacred triad of Love (feeling), Wisdom (thought), and Power (action) forms the foundation for fully absorbing the teachings of the Ascended Masters.

This remarkable series also guides your consciousness to transcend outdated paradigms of upheaval and transition into the Time of Ascension—a period of self-realization, divine connection, and Spiritual Freedom. Through these lessons, you will be empowered to embrace your true nature, align with higher dimensions, and actively participate in humanity's collective awakening.
