COMPANY INTRODUCTION

- Lamasat Experience LLC Oman provides various ranges of off-site volumetric **Pre-cast concrete products** that combines pioneering design and engineering techniques.
- Lamasat Experience LLC Oman also performs
 - **GRP (Glass Reinforced Plastic Works)**
 - **Telecom (Fiber Optic Works)**
 - **Trading of Specialized Construction Materials**
- Lamasat Experience LLC Oman has excelled in developing **cost and time effective solutions** on its business
- Lamasat Experience LLC Oman holds **well experienced precast professionals** in all the aspects like design, production, quality control etc..

OUR PRODUCTS

Solid & Insulated Walls

Columns & Beams

Solid Slabs

Boundary Walls

Staircases

Retaining Walls

Water tanks

Sleepers

Cladding panels

Foundations

Barriers

Manholes

OUR EQUIPMENTS

Lamasat Experience LLC Oman supplies wide range of equipment's and machineries on rental basis for building projects, infrastructure projects etc.

This includes:

- Self-Loading Batch Mixer
- Pre-casting Tables
- Concrete Batching Plant*
- Gantry Cranes*
- Generators
- Boom Trucks (7 Ton,10Ton)
- Crane 25 Ton
- Crawler Excavator
- Back Hoe Loader
- Reversing drum concrete mixer

QUALITY POLICY

Lamasat Experience LLC is committed to:

- *Building a long term relationship and to become a reliable company with customers, clients*
- *Apply our technical skills to all Quality aspects and impacts in the project delivery system;*
- *Set Quality objectives, measure result, assess, and continually improve the product processes*
- *Minimize our impact on the environment through pollution prevention, reduction of natural resources consumption and emissions, and the reduction and the recycling of waste;*
- *Identify and eliminate waste, minimize quality non-conformance;*
- *Ensure continuous client satisfaction;*
- *Plan for, respond to, and recover from any concern related to Quality;*

These above listed commitments are in addition to our basic obligation to comply with our Client / Consultant's standards, as well as all applicable laws and regulation where we operate.

LAMASAT EXPERIENCE L.L.C

PRODUCTION PROCEDURE

Purpose

The purpose of this procedure is to ensure Fabrication of Precast Concrete Elements are in accordance with the requirement specified in the relevant specification procedures and approved design drawings.

Scope

The scope of works includes the mould preparation, reinforcement, concreting, demoulding repairing, curing, marking, identification and stocking for the precast concrete elements.

Work Procedures

Mould preparation and reinforcement works

- All material used for mould should be clean, of adequate strength and clear from any deflection.
- All mould type shall be of steel material. Plywood type of mould shall be used for the special cases if required.
- Ensure fixed table flatness, surface levels before fixing mould.
- The mould and reinforcement are prepared according to the approved production drawings issued for construction.
- The mould should be properly supported by steel bars / magnets / welds whichever is applicable to maintain the proper alignment of the forms during concreting works.
- The mould shall be cleaned and coated with mould release agent.
- The mould joints shall be sealed water tight with silicone sealant.

لمسات الخبرة ش.م.م

LAMASAT EXPERIENCE L.L.C

- The mould shall be checked for its dimensions (inner, outer, thickness, diagonal, right angle), surface level and alignment as per the approved production drawing.
- Reinforcement material shall be procured from approved supplier. Test certificate for the procured lot shall be provided for records and verification.
- The reinforcement shall be placed in the mould and rebar shall be securely fastened with tying wire. The reinforcement shall be cleaned free from dust or grease.
- Sufficient concrete spacers shall be placed (4Nos/m²) to maintain the required cover for the reinforcement bars.
- All the cast in parts (lifting hooks, sockets, anchors, MEP fixtures, grouting sleeves, openings, recesses, chamfer) shall be fixed as per the approved production drawing.
- Level guides as required, shall be installed to maintain the level of concrete.
- Obtain the MEP clearance prior to concreting works.
- Random inspection / auditing shall be carried out by client / consultant to verify and witness the compliance of production activities in accordance with the approved production drawings and approved method statement
- Sampling and testing of fresh concrete shall be carried out as per the project requirements

Concreting works

- The production foreman or supervisor orders the required quantity of concrete to the batching plant.

لمسات الخبرة ش.م.م

LAMASAT EXPERIENCE L.L.C

- The concrete is prepared according to the approved concrete mix design and transported to the place of casting using transporting shuttle and discharged to concrete bucket.
- Grade of concrete and proportions of materials shall be as per the approved mix design.
- The fresh concrete shall be tested for workability and temperature. Sampling of concrete to be done as per the project specifications.
- The dropping height of the concrete shall not be more than 1.5m.
- Concrete is poured in the mould; sufficient vibration is given using needle vibrator / table vibrator according to the situation and type of element.
- Ensure the line, level of the concrete are as per approved production drawing.
- Contractor shall maintain the full reports on site for concrete work. Verification and auditing shall be carried out as per the project requirement
- The surface of the concrete shall be made smooth or rough based on the approved production drawings.
- After finishing of the concrete, the element is covered with polyethylene sheet.

Demoulding and curing works

- The element can be de-moulded only after the concrete achieves the minimum strength of 18 N/mm² or 16 N/mm² depending on the geometry and stripping of the element for lifting the elements.
- The elements are de-moulded by tilting the elements. Whereas, the parapet, staircase, column and beams are de-moulded directly from the mould.
- All the casted elements shall be marked with project number, element number, casting date, and weight before shipping / moving to the stockyard.
- All the de-moulded elements are verified for dimensions, cast in parts, tagging and repair.
- If any, repairing works shall be carried out as per the approved procedure.
- The casted concrete shall be water cured for a period of 3 days to achieve the desired strength prior to transportation.
- Ensure that capacity of the crane is adequate to lift the precast concrete panels
