## Permission, Authorization & Informed Consent for Treatment at High Point Health pllc, dba Jade River Acupuncture

**Miranda R. Taylor, WA State East Asian Medicine Practitioner license AC 00002224**

**Purpose of treatment:** The purpose of treatment is to resolve your complaint, i.e., the reason you are seeking treatment. The clinic provides diagnosis and treatment to promote health and treat organic and/or functional disorders. Miranda Taylor is licensed in WA since 2003 with a Bachelor of Science in biology with extensive chemistry coursework, and a 4 year Master's degree in Traditional Chinese Medicine.

**Nature of treatment:** High Point Health pllc dba Jade River Acupuncture provides East Asian Medicine as well as Nutrition Response Testing(SM). The scope of East Asian Medicine practice includes acupuncture, electro-acupuncture, moxibustion, acupressure, cupping, Gua Sha (dermal friction), infrared, sonopuncture (sound stimulation), laserpuncture, point injection therapy (aquapuncture) as well as dietary advice and health education based on East Asian medical theory. It also includes herbal, vitamin, and nutritional supplements; breathing, relaxation, and exercise techniques; Qi Gong, East Asian massage, and Tui Na; plus heat and cold therapies.

Nutrition Response Testing involves a Nutrition Response Testing health analysis and use of kinesiology (body reflexes) to inform Chinese medicine recommendations and to develop a natural health improvement program. The program can include dietary guidelines, nutritional supplements and life-style recommendations in order to assist the patient in improving his or her health. Note that Nutrition Response Testing is not for the treatment or "cure" of any disease. Nutrition Response Testing is a safe, non-invasive method of analyzing the body's physical and nutritional needs, and determining which deficiencies or imbalances could contribute to health problems.

**Benefits of treatment:** Acupuncture and East Asian Medicine procedures and nutrition have been used effectively to treat disease for hundreds of years. The World Health Organization lists over 40 conditions that can be effectively treated by acupuncture. These include muscular-skeletal injuries, digestive difficulties, respiratory diseases, women's health issues, etc. However, this record does not allow a guarantee of any individual course of treatment.

Nutrition Response testing does not promise or guarantee the results of treatment with this modality or any natural health, nutritional, or dietary programs recommended by Miranda Taylor. I understand that Nutrition Response Testing is a means by which the body's natural reflexes are used to determine possible nutritional imbalances so that safe natural programs can be developed and modified for the purpose of bringing about a more optimum state of health. I understand that Nutrition Response Testing is not a method for "diagnosing" or "treating" any specific disease, including conditions such as cancer, AIDS, infections, or other medical conditions, and that these are not being tested for or treated.

**Risks of treatment:** East Asian Medicine procedures have been shown to be relatively safe. There are some uncommon but potential risks, which include discomfort during and after treatment, "needle sickness" which includes dizziness or fainting that might occur if the patient has not eaten shortly before the treatment; localized but minor bruising or swelling; minor burns from moxibustion, infection (rare with the use of disposable needles); broken needles; and temporary aggravation of symptoms that existed prior to treatment.

With Nutrition Response Testing, risks are minimal. Occasional aggravation of symptoms can occur if the body is detoxing rapidly, but special appointments should be made to quickly remedy them.

**NOTE:** Please notify Miranda if you experience any adverse effects from your treatment. She will be glad to work with you to overcome any adverse effects immediately, if they arise at all.

**Special Situations:** You must inform Miranda if you have severe bleeding disorder, wear a pacemaker, or have any other electronic medical device on your body. Because some herbs and acupuncture points are contra-indicated during pregnancy, notify Miranda if you are pregnant or if you might become pregnant.

**Confidentiality of medical records:** Your medical records are not released to anyone or any organization without your written consent. If data from this clinic are used in research, all identities and individual records are kept confidential.

**Required consultations:** Washington State law requires acupuncturists to receive a written diagnosis or to consult with a primary care provider (MD, DO, ND,PA, ARNP) before treating patients with any of the following potentially serious disorders: cardiac conditions, including uncontrolled hypertension; acute abdominal symptoms; acute, undiagnosed neurological changes; unexplained weight loss or gain in excess of 15% of body weight within three months; suspected fracture or dislocation; suspected systemic infection; any serious undiagnosed hemorrhagic disorder; and acute respiratory distress without previous history or diagnosis. This consultation requires your authorization; if you refuse the authorization or do not provide a recent diagnosis from the physician, you will have to sign a waiver so that treatments may continue.

**Consent:** By signing below, you request and consent to the performance of acupuncture, East Asian medicine treatments, and/or Nutrition Response Testing treatments. You are free to withdraw your consent and stop treatment at any time. Your signature indicates that you have read and understand the preceding information in this document and that if you have any questions, you will ask Miranda before signing.

You hereby release High Point Health pllc dba Jade River Acupuncture from any and all liability that may occur in connection with your treatments, except for the failure to perform the procedures with appropriate medical care. Your signature also indicates your understanding that you are ultimately responsible for all financial obligations for treatments.
