

SICK POLICY

Our first priority at Poppy's is to provide a healthy, safe learning environment for all children. A child will be sent home as soon as possible if any of the following is experienced: an illness prevents the child from participating comfortably in activities (as determined by the staff); an illness results in a greater need for care than the staff can reasonably provide without compromising the health or safety of other children in the classroom; or a child is experiencing any of the following conditions:

- Fever of 100.4 or greater, until 24 hours symptom free without fever reducing medication
- Signs/symptoms of severe illness, including: lethargy, uncontrolled coughing, inexplicable irritability or persistent crying, difficulty breathing, and/or wheezing
- Diarrhea (not associated with diet changes or medications; multiple loose or watery instances within an hour; or accompanied with fever and or vomiting) until diarrhea stops for 24 hours or the continued diarrhea is deemed not be infectious by a licensed healthcare professional.
- Blood in stools not explainable by dietary change, medication, or hard stools
- Vomiting (One instance) the child can return after vomiting has been resolved for 24 hours or until a health care provider determines the cause for vomiting is not contagious and the child is not in danger of dehydration
- Persistent abdominal pain (continues more than 2 hours) or intermittent pain associated with fever or other signs/ symptoms of illness
- Mouth sores with drooling, unless a health care provider determines the sores are not contagious
- Rash until a physician determines that these symptoms do not indicate a communicable disease
- Pink eye (conjunctivitis) until after treatment has been initiated for 24 hours
- Scabies, until after treatment has been completed
- Tuberculosis, until a health care provider states that the child is on appropriate therapy and can attend child care
- Impetigo, until 24 hours after treatment has been initiated
- Strep throat, until 24 hours after initial antibiotic treatment and cessation of fever
- Chicken pox, until all sores have dried and crusted (usually 6 days)
- Hand Foot and Mouth sores have dried and crusted and no fever
- Pertussis, until 5 days of appropriate antibiotic treatment has been completed
- Mumps, until 9 days after onset of symptoms
- Hepatitis A virus, until 1 week after onset of illness
- Measles, until 4 days after onset of rash
- Rubella, until 6 days after onset of rash
- Unspecified respiratory tract illness accompanied by another illness which requires exclusion
- A child who becomes ill while at Poppy's with Herpes simplex, which is uncontrollable, must be removed from the classroom in order to limit exposure of other children drooling to communicable disease.
- An ill child will be sent to the office to wait for his/her parents to arrive. For this reason, we ask families to make every effort to pick up a sick child as soon as possible.

Poppy's reserves the right to make the final determination of exclusion due to illness. Any exceptions to our illness policy will require a written note from a licensed healthcare professional stating that the child is not contagious.

Please contact Poppy's Playroom at (435)-799-9959 or Playhouse at (801)-755-6439 by 9:00AM via call or text, or through the Procure App whenever your child is ill.
