

COTTONWOOD FIRE PROTECTION DISTRICT COMMUNITY CPR / FIRST AID PROGRAM

The Community CPR Program teaches citizens to contribute to the survival of loved ones and co-workers by empowering them to identify and treat cardiac related medical emergencies (heart attacks) prior to EMS arrival. Rapid intervention and early activation of the 911 system has had a dramatic positive effect of the survivability of heart attack victims in our community. Statistics show that half of the victims that survived a fatal heart attack survived because someone performed CPR on them prior to the arrival of the Fire Department and EMS personnel.
