RESOLUTION

18-09-004

The Cottonwood Fire Protection District does hereby not increase the Mitigation Fee by any annual factor for the 2018/19 fiscal year, as based on the ENR Cost Index of San Francisco for construction, the index used in the engineering study for the 2017/18 fiscal year, it will however apply the standard administration fee of 5% This increase is in accordance with Resolution 09-04-001.

This increase will equate to a fee of \$ 1743.32 for each new Capital Improvements for the fiscal year 2018/2019 for residential properties.

The Cottonwood Fire Protection District, also hereby mandates the Mitigation Fee for all non-residential / non-habitable buildings 2000 sq. ft. in area to be at the rate of 0.64 cents per square foot as based on the ENR Cost Index of San Francisco for construction, the index used in the engineering study, together with the administration fee of 5%. This is in accordance with Resolution 09-04-001. The Board of Directors have decided to use a sliding scale for any building less than 2000 sq. ft. but over the minimum 500 sq. ft., the reasoning for this decision is to place a less economic burden for smaller buildings with less fire potential due to less contents.

The area to be assessed is at the discretion of the jurisdiction and at this time is at a minimum, an area of 500 square feet.

This Resolution replaces all previous resolutions on this subject.

The following is the charge including admin fees:

> 500 sq. ft.	\$250.00
> 1000 sq. ft.	\$600.00
> 1500 sq. ft.	\$945.00
> 2000 sq. ft.	\$1340.00

Ayes.....4.....Nos.....0.....Abs.....0.....
