

# Jazz Discontinued

Honda

## Honda Jazz

Honda Jazz is a family car that offered the most space from a small car. Honda's Jazz unfortunately never took off on our roads and remained a slow and laggy seller for Honda. There have been rumours since a year that Honda might soon discontinue the Honda Jazz. Honda after BS6 norms removed the diesel engine due to lack of sales. Honda claimed that more than 60% of its sales happen from the CVT variants. However with RDE norms Honda finally took Jazz off its shelf.
