USPF TECHNICAL RULES ~ ALL DIVISIONS

Throughout this rulebook, wherever personal and possessive pronouns (he, she, his, or hers) occur, such reference is deemed to apply to either sex.

Part 1.

GENERAL RULES:

1. The United States Powerlifting Federation recognizes the following:
 - 1.1. All lifts which must be taken in the same sequence in all "three-lift competitions" conducted under USPF rules:
 - 1.1.1. Squat
 - 1.1.2. Bench Press
 - 1.1.3. Deadlift.
 - 1.2. Competition takes place between lifters in categories defined by sex, bodyweight and age. The Men and Women's Open Championships permit lifters of any age more than 13 years.
 - 1.3. The rules apply to all levels of competition whether it is World and International or any competition that states that it is conducted under USPF Rules.
 - 1.4. Each competitor is allowed three attempts on each lift. Any exceptions are explained in the appropriate section of the rulebook. The lifter's best valid attempt on each lift, disregarding any fourth attempts for record purposes, counts toward his competition total. The winner of a category shall be the lifter who achieves the highest total. The remaining lifters shall be ranked in descending order of total. Lifters failing to achieve a total are eliminated from the competition. If two or more lifters achieve the same total, the lighter lifter ranks above the heavier lifter.
2. The USPF through its member federations conducts and sanctions the following World and National Championships:
 - 2.1. Men's Open World and National Championships
 - 2.2. Women's Open World and National Championships

4. The USPF also recognizes and registers records for the same lifts within the categories described in Part 1.

- 7.1.2. Each team is allowed a maximum of two alternates or reserves. These alternates or reserves may be substituted at any time before the commencement of the weigh in for a particular bodyweight category. Each team must submit a team roster giving the name of each lifter, bodyweight category and best total achieved during the previous twelve months. The date and title of the competition in which the best total was achieved must also be stated. These details must be submitted to the responsible official before the commencement

of the weigh in for the lowest weight category, i.e. 52.0-kg/114 lb for men and 44.0 kg/97 lb for women. The names of the alternates or reserves with their bodyweight categories and best totals must also be submitted at this time.

7.1.3. Teams shall be nominated to the Secretary of the USPF and/or the Meet Director at least twenty-one (21) days before the date of the championships. Failure to comply with this requirement may result in disqualification of the offending team.

7.2. World Teams are structured as follows:

7.2.1. All lifters who lift and post a total at the annual USPF Nationals and/or completes at any eligible single-lift USPF Nationals shall be able to attend and lift in the Worlds. Qualifying order will be based on the "Wilk's" Formula for all classes except Master's Classes. All Master lifters will be ordered based on a combination of the "Wilk's" Formula and the "Revised McCulloch" Formula. This is only to assist the US National Team Coach in selecting lifters for the USA Team Entry. Note: This will be done at the World Meet based on lifters that qualified and entered the World competition.

Should blood come in contact with the bar or equipment the lifting shall be stopped and the bar or equipment sterilized with a bleach solution. This shall consist of 1 part bleach to 3 parts water. It is the Promoter's responsibility to have such a solution present at the competition.

13. Inspection of Costume and Personal Equipment

13.1. In large competitions when the allotted weigh in time is likely to be insufficient to allow for the inspection of costume and personal equipment, the Technical Chairman or the Chief Referee, at his discretion, may fix a separate time for the equipment inspection. In normal circumstances this shall take place one hour before the official weigh in, but

may be varied as required by the Technical Chairman or Chief Referee.

- 13.2. The Technical Chairman or a minimum of two referees shall be appointed to fulfill this duty. All items shall be examined and approved before being officially stamped or marked.
- 13.3. Wrist wraps over permitted length shall be rejected, but may be cut to correct length and resubmitted within the specified inspection time. It is the lifter's responsibility to cut the wrist wraps. The examining referee is not permitted to perform this service.
- 13.4. Any item considered unclean or torn shall be rejected.
- 13.5. The referees shall record each item on the official inspection sheet. The inspection sheet shall be handed to the Technical Chairman or the Chief Referee at the end of the inspection period.
- 13.6. If after the inspection, a lifter appears on the platform wearing or using any illegal item or article not recorded on the inspection sheet, the lifter shall immediately be disqualified from the competition.
- 13.7. All items mentioned previously under Costume and Personal Equipment shall be inspected prior to the competition together with any other items that the lifter may wish to wear on the platform. The USPF Board of Directors reserves the right to limit the size of the logo. Nations or lifters may display national emblems or badges.

- 14.5. The uses of substance like ammonia snaps, smelling salt, etc. cannot be used anywhere near the lifting platform. Lifter is responsible for disposing these substances after his attempt.

Part 4.

WEIGHING IN

1. Weighing in of the competitors must take place no earlier than two hours before the start of the competition for particular category/categories. All lifters in the category/categories must attend the weigh in, which will be carried out in the presence of appointed referees for those category/categories. (Note that if necessary, weight categories may be combined in a single lifting session). A 24-hour weigh in is acceptable.
2. The weigh in period will last one and a half hours. During the weigh-ins, a bodyweight class limit sheet should be located near the scale for reference for the officials and the lifters.
3. The weigh in for each competitor will be carried out in a locked room with only the competitor, his coach or manager and the referees present. The lifters agreed body weight must not be made public until all the lifters competing in the particular category have been weighed in.
4. Lifters must be weighed in either their costume (lifting suit or singlet), in their underwear or nude and without shoes or belt, which complies with the specifications, set out in the appropriate section of the rulebook and which does not effectively change the lifter's weight. If a question exists regarding weight of undergarments, a re-weigh in the nude may be requested. In competitions in which women are competitors, the weigh in procedure may be altered to ensure that lifters are weighed by officials of their own sex. Additional female officials may be appointed for this purpose.
5. If not previously carried out, the inspection of costume and personal equipment will take place during the weigh in period. However, the lifters must be weighed in the priority of the previously determined order of lifting. The equipment will only be checked after all lifters have made their first visit to the scales. The technical officers or the appointed referees will be responsible for inspecting, measuring and recording on the inspection form, details of all items listed under "Costume and Personal Equipment". The items shall be approved and marked accordingly. The referee responsible for this inspection will also be responsible for ensuring that the details recorded correspond with the items worn and used by the lifter on the platform.
6. Each lifter may only officially weigh-in once. Only those whose bodyweights are heavier or lighter than the category limits of the category entered are allowed to return to the scales. They must return to the scales and make weight within the limits of the hour and a half-allowed for the weigh in otherwise; they will be eliminated from the competition for that bodyweight category. Lifters being weighed in for the first time take precedence over lifters being re-weighed. A lifter can only be re-weighed after all lifters in the same bodyweight category have been called to the scales. Lifters trying to make weight may be weighed as often as time and orderly progression by lots allows. A lifter may only be weighed outside the time limit of one and a half hours if he presents himself within the time limit, but due to the number of lifters trying to make weight, he is denied the opportunity of mounting the scales. He may

then be allowed one re-weigh at the discretion of the referees.

7. A lifter shall be nominated in his normal bodyweight category. However, each lifter will have the option of changing categories up or down from that in which he was originally nominated on the final team nomination form. If the lifter wishes to exercise this option, he must present himself to the Chief Referee at the weigh in room ten minutes before the commencement of the weigh in for his final choice of bodyweight category. If he wishes to move up, the lifter must also report to the Chief Referee of his originally nominated lower category, ten minutes before the commencement of the weigh in for that category in order to be excused. If a lifter changes categories, then the lifter shall be placed at the top of the order for being weighed in that new category. If the lifter's new bodyweight category is to be split into alternating groups because of the number of competitors, then unless he can produce irrefutable evidence of a total made in that new category during the preceding twelve months at a national or international level, he will automatically be placed in the first group to lift.
 - 7.1. Example (a) - A lifter nominated at 90 kg wishes to lift at 82.5 kg. He must present himself to the Chief Referee of the 82.5 kg category ten minutes before the commencement of the weigh in for that category.
 - 7.2. Example (b) - A lifter nominated at 90 kg wishes to lift at 100 kg. He must report to the Chief Referee of the 90 kg category before the weigh in commences and state that he wishes to move up into the 100 kg category and therefore does not wish to weigh in. He must then also present himself to the Chief Referee of the 100 kg category ten minutes before the commencement of the weigh in for that category. It is the responsibility of the lifter to know the body weight category for which he was originally nominated. A claim that an error had been made on the final nomination form will not be accepted.
8. If two lifters register the same bodyweight at the weigh in and eventually achieve the same total at the end of the competition, they will be re-weighed and the lighter person will take precedence over the heavier person. However, if they still weigh the same after re-weighing, they will then share the placing, and each receives an award. In such circumstances should two lifters be in first place, and then the next lifter shall be placed third and so forth.
9. Lifters should, if required, check squat and bench press rack heights and foot blocks prior to the start of the competition.
10. For any age related class, proof of age must be provided. Documents unsupported by photographic proof are not acceptable for proof of age. Only official documents giving photographic evidence with corresponding personal details will be acceptable: i.e., passport, driver's license, state I.D. with photo on it, etc. This shall also apply to Master and Junior lifters competing in the open class in support of any record attempts. A birth certificate with an official document (i.e. passport, driver's license, state I.D., etc.) may also be required for any additional verification.
11. If any lifter fails to achieve a total and is eliminated from any competition (a.k.a. bombing out of the meet), as stated in rule Part 1, Item 1.4, he cannot pay another entry or just re-enter the competition in another weight class and/or division. If a lifter is eliminated from a full power competition, he cannot re-enter into the single lift bench press or deadlift portion of the competition once the meet has commenced. Also, if a competition is held over a number of days and a lifter is eliminated from one days lifting, he cannot pay another entry to re-enter the

competition in another higher or lower weight class and/or division on the next day of the competition. As stated in Item 7 above, a lifter cannot re-weigh back into a competition once he has been eliminated from it, for he can only officially weigh-in once per competition.

Part 5.

POWERLIFTS AND RULES OF PERFORMANCE

1. Squat

- 1.1. The lifter shall face the front of the platform.
- 1.2. Not more than five and not less than two spotter/loaders shall be on the platform at any time.
- 1.3. The lifter may enlist the help of the spotter/loaders in removing the bar from the racks; however, once the bar has cleared the racks, the spotter/loaders shall not assist the lifter further with regard to proper positioning, foot placement, bar positioning, etc.
- 1.4. The lifter shall not hold the collars, sleeves or discs at any time during the performance of the lift. However, the edge of the hands gripping the bar may be in contact with the inner surface of the collars.
- 1.5. After removing the bar from the squat racks or the mono-lift, the lifter must move backwards to establish his position. The lifter shall assume an upright position with the top of the bar not more than 3 cm below the top of the anterior deltoids. The bar shall be held horizontally across the shoulders with the hands and fingers gripping the bar and the feet flat on the platform with the knees locked.
 - 1.5.1. Where a mono-lift is in place, the swing arm pin and lever cannot be actuated. The lifter must still un-rack the weight and move backwards to establish his position.
- 1.6. The lifter shall wait in this position for the Chief Referee's signal. The signal shall be given as soon as the lifter is motionless and the bar properly positioned. The Chief Referee's signal shall consist of a downward movement of the arm and the audible command "SQUAT".
- 1.7. Upon receiving the Chief Referee's signal, the lifter must bend the knees and lower the body until the top surface of the legs at the hip joint is lower than the top of the knees.

A: Top of the Knees B: Top surface of the leg at the hip joint

The diagram above shows a lifter just below parallel. Point "B", the top surface of the

leg at the hip joint below point "A", the top of the knee. This is a good lift.

- 1.8. The lifter must recover at will without double bouncing or any downward movement to an upright position with the knees locked. When the lifter is motionless, the Chief Referee will give the signal to replace the bar.
 - 1.9. The signal to replace the bar will consist of a backward motion of the hand and the audible command "RACK".
 - 1.9.1. The lifter must make a bona fide attempt to return the bar to the rack once the "RACK" command is given.
 - 1.10. The lifter may, at the Chief Referee's discretion, be given an additional attempt at the same weight if failure in an attempt was due to an error by one or more of the spotter/loaders.
2. Causes for Disqualification of a Squat
- 2.1. Failure to observe the Chief Referee's signals at the commencement or completion of a lift.
 - 2.2. Double bouncing or more than one recovery attempt at the bottom of the lift.
 - 2.3. Failure to assume an upright position with the knees locked at the commencement and completion of the lift.
 - 2.4. Any shifting of the feet laterally, backwards or forwards, during the performance of the lift.
 - 2.5. Failure to bend the knees and lower the body until the top surface of the legs at the hip joint is lower than the top of the knees (below parallel).
 - 2.6. Changing the position of the bar across the shoulders after the commencement of the lift.
 - 2.7. Contact with the bar by the spotter/loaders between the referee's signals.
 - 2.8. Contact of elbows or upper arms with the legs.
 - 2.9. Failure to make a bona fide attempt to return the bar to the racks.
 - 2.10. Any dropping or dumping of the bar after completion of the lift.
 - 2.11. Failure to comply with any of the requirements contained in the general description of the lift, which precedes this list of disqualifications.
3. Bench Press
- 3.1. The head of the bench must be placed on the platform facing the Chief Referee.
 - 3.2. The lifter must lie on his back with shoulders and buttocks in contact with the flat bench surface. The hands may grip the bar with a "thumbs around" grip, thumbless grip or reverse grip as long as the rings on the bar are covered. He may not grip outside the 81cm mark. The lifter's shoes (including toe portion) must remain flat on the floor maintaining solid contact with the platform or surface. This position shall be maintained throughout the attempt. The head may rise during the lift.
 - 3.3. If the lifter's costume and the bench surface are not of a sufficient color contrast to enable the referees to detect possible raising movement at the points of contact, then the bench surface may be covered accordingly.
 - 3.4. To achieve firm footing the lifter may use flat surfaced plates or blocks not exceeding 30 cm in total height, to build up the surface of the platform. Whichever method is chosen, the entire foot must be flat on the surface. If blocks are used, they shall not exceed 45 cm x 45 cm.
 - 3.5. Not more than four and not less than two spotter/loaders shall attend. The lifter may enlist the help of the spotter/loaders in removing the bar from the racks. The lift off, if assisted

- by the spotter/loaders, must be to arms length.
- 3.6. The spacing of the hands shall not exceed 81 cm (31.6 in). The use of a reverse grip is allowed, as long as the 81 cm marks are covered.
 - 3.7. After removing the bar from the racks or receiving it from the spotter/loaders, the lifter shall wait motionless and the bar properly positioned and elbows locked before he can begin to descend the bar to his chest. Note: The lifters elbows must show a definite and visible locked position before the bar can be lowered. No “soft starts” are allowed.
 - 3.8. Once the bar is paused and motionless, the audible command “START” will be given
 - 3.9. The lifter must lower the bar to the chest; hold it motionless on the chest with a definite and visible pause. Note: The chest area is defined as from the bottom of the collarbone to the bottom of the pectoral muscle line as it crosses the sternum.
 - 3.10. Once the bar is paused and motionless on the chest, the audible command “PRESS” will be given. The bar must be pressed upwards with an even extension of the arms to arms length with elbows fully locked. Note: If a lifter has any physical abnormality, handicap or incapacity of extending their arm or arms to arms length with elbows fully locked, they must inform the Chief Referee prior to the start of their lift.
 - 3.11. When the bar is held motionless in this position the audible command "RACK" is given.
4. Causes for Disqualification of a Bench Press
- 4.1. Failure to observe the Chief Referee’s signals at the start, middle or completion of the lift.
 - 4.2. Any change in the elected lifting position other than the head during the lift i.e. any raising movement of the shoulders, buttocks or feet from their original points of contact with the bench or the floor, or lateral movement of the hands on the bar. Feet must remain flat on the floor, however, incidental movement fore and aft as much as ½ the length of the lifters foot is now permitted.
 - 4.3. Heaving, bouncing, or sinking the bar after it has been motionless on the chest.
 - 4.4. Any uneven extension of the arms during the lift.
 - 4.5. Any downward movement of the bar in the course of being pressed out.
 - 4.6. Failure to press the bar to full extension of the arms at the completion of the lift.
 - 4.7. Contact with the bar by spotter/loaders between the Chief Referee’s signals.
 - 4.8. Any contact of the lifter’s feet with the bench or its supports.
 - 4.9. Deliberate contact between the bar and the bar rest supports during the lift in order to make the press easier.
 - 4.10. Placing the bar below the pectoral muscle line as it crosses at the sternum, a.k.a. a “belly bench”. This includes placing the bar so low on the torso that it touches the lifter’s belt which is not acceptable nor is at the point of the lifters naval.
 - 4.11. Failure to comply with any of the requirements contained in the general description of the lift, which precedes this list of disqualifications.
 - 4.12. If a lifter wears the buckle of his belt at his back during the bench presses.
 - 4.13. If a lifters elbows do not show a definite and visible locked position before the bar is lowered, a.k.a. a “soft start”.
5. Deadlift
- 5.1. The lifter shall face the front of the platform.
 - 5.2. The bar must be laid horizontally in front of the lifter’s feet, gripped with an optional grip in both hands. The lifter can start the lift at any time before the one minute clock expires. Once started, it must be lifted without any downward movement until the lifter is standing erect.

- 5.3. Upon completion of the lift, the knees shall be locked in a straight position and the shoulders back.
- 5.4. The Chief Referee's signal shall consist of a downward movement of the hand and the audible command "down". The signal will not be given until the bar is held motionless and the lifter is in the apparent finished position.
- 5.5. Any rising of the bar or any deliberate attempt to do so will count as an attempt.

The correct finishing position in the deadlift is shown at position No. 2 above. The lifter must be standing erect with their shoulders back and knees locked.

6. Causes for Disqualification of a Deadlift
 - 6.1. Any downward movement of the bar before it reaches the final position.
 - 6.2. Failure to stand erect with the shoulders back.
 - 6.3. Failure to lock the knees straight at the completion of the lift.
 - 6.4. Supporting the bar on the thighs during the performance of the lift.
 - 6.5. Stepping backward or forward although lateral movement of the sole or rocking feet between ball and heel is permitted.
 - 6.6. Lowering the bar before receiving the Chief Referee's signal.
 - 6.7. Allowing the bar to return to the platform without maintaining control with both hands.
 - 6.8. Failure to comply with any of the requirements contained in the general description of the lift, which precedes this list of disqualifications.

Part 6.

ORDER OF COMPETITION

**Early on in the sport of powerlifting; the meet began with the lowest weight attempt and worked its way to the highest weight attempt until all the lifters did their three attempts. This was done for all three lifts: Squat, Bench Press, and Deadlift. Many times a lifter had to follow himself with all three attempts, only being allowed three minutes to recuperate between attempts. In the 1980's, the format of the meet was changed by adding Flights and the Round System.*

1. Flights

- 1.1. When 15 or more lifters are competing in the competition, flights must be formed consisting of approximately the same amount of lifters in each flight. A flight can consist of one bodyweight category or several bodyweights combined. The lower bodyweight lifters will be in Flight 1 and so on. Lifters cannot be separated from their

bodyweight category to “equal” the amount of lifters in another flight.

2. Round System

- 2.1. A meet consists of 3 rounds: 1st round for 1st attempts, 2nd round for 2nd attempts and the 3rd round for last attempts. Flight 1 lifts first until all lifters in this flight have completed all 3 attempts in the squat. This procedure continues until all flights have completed the 3 attempts in the squat. The same order continues through the bench press and deadlift. Fourth attempts are only allowed for a USPF or World Record and are not added into the lifter’s Total. Fourth attempts are done at the end of the flight and are only allowed if the lifter’s 3rd attempt was a good lift.
- 2.2. Lifting order for the flights in each round is determined by the lifter’s amount of weight he chooses to lift starting with the lowest attempt to the highest attempt consecutively. If two lifters in a flight have the same amount of weight for an attempt, the lower bodyweight lifts first. The weight on the bar is never lowered for any reason except for an official’s error in loading. Each lifter receives one attempt in each round. If the bar is loaded higher than what is written on the scorecard or attempt sheet due to an official’s error and the lifter doesn’t make the lift, he can take that attempt over, with the correct amount of weight on the bar, at the end of that flight’s lifting. If the bar is loaded to a lower amount of weight than what is written on the scorecard or attempt sheet due to an official’s error and the lifter makes the lift, he has the option of either accepting the lift or taking the attempt over, with the correct amount of weight on the bar, at the end of that flight’s lifting.
- 2.3. When the Head Referee says, “Bar is Loaded”, the lifter has one minute to begin his lift. If the lifter exceeds one minute, he forfeits that attempt.
- 2.4. If two lifters in the same age category and weight class tie in Total, they will both reweigh and the lighter of the two wins that Place. If they both weigh the same, they share that Place win.
- 2.5. Intervals between the squat and bench press, or bench press and deadlift, should not be less than 10 minutes nor more than 30 minutes.
- 2.6. Most meet directors usually run Full Power Meets but do offer the Single Lift Squat, Single Lift Bench, Single Lift Deadlift and sometimes the Push/Pull on the entry. Lifters that entered Single Lifts or Push Pull will be integrated into the bench and deadlift sessions of the Full Power Meet and what they lift will be applied to those events for awards, records and placement. Full Power lifters, who entered any of these other events, will have their lifts applied to the Single Lifts and/or Push Pull events for awards, records and placement. The only exception is if the Full Power Meet is held on a different day than the other events, in which case, no bench or deadlift lifts from the FP Meet can be applied to those events. Lifters must lift on the designated day of the event(s) they have entered.

3. Attempts

- 3.1. Attempts must be written in accordance with the discs being used; ex. if kilo discs are being used, attempts must be written in kilos.
- 3.2. Lifters must write their first attempts, and initial them, on their scorecard or attempt sheet at Weigh Ins. First attempts may be changed up to 5 minutes before the meet commences. Second attempts on the squat, bench press and deadlift cannot be changed once given nor can third attempts on the squat or bench press. Third attempts can only be changed for the deadlift with an allowance of two weight changes. Once the bar is loaded for the lifter, no changes can be made.

- 3.3. After an attempt is completed, the lifter has one minute to give his next attempt to the scorekeeper or expeditor. If the lifter fails to do so, the scorekeeper will add 2.5 kilos or 5 pounds to the previous good attempt for the lifter's next attempt or enter the same weight if the lift was no good.
- 3.3. The lifter must make at least one good attempt of the three in a round or he will be eliminated, aka "bombed", from that event and can no longer lift in that event. If the lifter bombed in the squat and had entered one of the Single Lift Bench Press, Single Lift Deadlift, and/or Push Pull events, he may continue to lift for those events. A lifter cannot enter any event once the meet commences, including multiple day meets (example: USPF National Championships).
4. Scorecard and Attempt Sheets
- 4.1. Electronic scoring software may be used.
- 4.2. Scorecards and Attempt Sheets should include the following:
- Name and date of meet
 - Lifter info such as Name, DOB, Age at meet, lifter's sex, Bodyweight, and Weight Class
 - Area for Weigh In Official's initials.
 - Rack Heights plus In/Out
 - Events Offered: Full Power, Single Bench Press, Single Lift Deadlift, and/or Push Pull
 - Divisions Offered: Raw, Single Ply (Division 1) and/or Multi Ply (Division 2)
 - Age Categories: Open, Teens, Juniors, Submasters, and/or Masters
 - "Table" to write down attempts for the three lifts, Best Lifts, Total, and 4th attempts for records.
- 4.3. A lift that is deemed "good", the attempt is circled; "bad", the attempt has a line drawn diagonally through it. The highest weight circled for each lift (squat, bench press, and deadlift) is written in the Best Lift boxes. For a Full Power, add up all three Best Lifts for the Total. For Push Pull, add up the two Best Lifts (bench press and deadlift) for the Total. Calculate 1st-3rd Places from the Totals for each Event, Division, Age Category and Weight Class.

<NAME, DATE, LOCATION OF MEET

5. Appointed Officials ~ The Meet Director will appoint the following officials:

5.1. Speaker/Announcer ~ Responsibilities are as follows:

5.1.1. The Speaker is responsible for the efficient running of the competition and acts as the Master of Ceremonies. The Speaker arranges the attempts chosen by the lifters in an orderly fashion, dictated by weight and flight numbers and announces the weight required for the next attempt with the name of the lifter. If the Scorekeeper arranges the attempts, it is the Speaker's responsibility to check accuracy. When the bar is loaded and the platform cleared for lifting, the Chief Referee will indicate the fact to the Speaker, who will in turn announce that the bar is ready and call the lifter by name to the platform. The Speaker will abstain from announcing subjective personal opinions such as "the lift looks good to me." Attempts announced by the Speaker should be displayed upon some form of scoreboard erected in a prominent position. If more than one platform is being used at a meet, this same Speaker is to be the Announcer for all platforms.

5.2. Technical Chair or Chief Referee in the absence of the Technical Chair

(Refer to Bylaws, Article IVB, Technical Chair for complete list of duties.)

The Technical Chair should preferably be a qualified International Referee or as knowledgeable of the Rules. In the absence of the Technical Chair, the Chief Referee should be the highest ranking Referee at the competition with comparable knowledge of the rules.

Responsibilities of the Technical Chair, or Chief Referee in lieu of his absence, are as follows:

5.2.1. He is responsible for attending the technical meeting prior to the competition and compiling the referee schedules from the names of those referees declared available for duty throughout the competition.

5.2.2. He will complete the necessary Duty Referees and Assignments list for the competition and inform referees of the categories to which they have been allocated. After the technical meeting when the final team nominations have been compiled the Technical Chairman will initiate a score sheet, equipment check sheet, rack height sheet and order of weigh in sheet for each category in the competition, entering the names of all lifters nominated in that category. It is the responsibility of the Meet Director to provide all the necessary blank forms and paperwork to enable the Technical Chairman to carry out his work.

5.2.3. He will approve the Speaker's competition/attempt cards for every lifter in the category. If computer scoring software is being used that has computer generated attempt cards/slips, the technical chairman will make sure that these attempt cards/slips have an area for the lifter to initial his attempts. The equipment check sheet and rack height sheet are to be handed to the Head Referee before lifting begins and flight sheets before that lift (squat, bench press, or deadlift) begins.

5.2.4. If possible, he will attend each weigh in and advise the duty referees upon procedure and any other matters that may require attention.

5.2.6. For World Competitions, The Technical Chair should preferably be from the host nation and able to deal effectively with any problem that may arise due to language difficulties at the venue.

5.3. Timekeeper (preferably a qualified referee or Head Referee). Responsibilities are as follows:

5.3.1. The Timekeeper is responsible for accurately recording the time lapse between the announcement that the bar is ready and the lifter starting his attempt.

5.3.2. He is also responsible for recording time allowances, whenever required. Example: after an attempt the lifter shall leave the platform within 30 seconds except if a lifter is having his equipment checked after a record breaking attempt.

5.3.3. Once the clock is running for a lifter, it can only be stopped by the completion of a time allowance, the start of a lift, or at the discretion of the Head Referee. Consequently, it is of great importance that the lifter or his coach check the height of the squat racks prior to being called, as once the bar is announced as being ready, the clock will be started. Any further adjustments to the racks must be made within the lifter's one-minute allowance.

5.3.4. The lifter is allowed one minute in which to start his attempt after being called to the platform. If he does not start his attempt within this time allowance, the timekeeper will call time and the Head Referee shall give the audible command "rack". The lift will be declared "no lift" and the attempt forfeited. When the lifter

starts the lift within the prescribed time allowance, the clock will be stopped. The definition of the start of an attempt depends upon the particular lift being performed. In the squat, the start is to coincide with the Head Referee's commencement signal. In the bench press, the start is when the lifter begins to lower the bar. In the deadlift, the start is when the lifter makes a determined attempt to raise the bar.

5.3.5. If a computer time keeping software is being use, the timekeeper should have full knowledge of the software's function and capabilities.

5.4. Expeditors ~ Responsibilities are as follows:

Expeditors are not required when using the round system, as a Scorekeeper or an official seated at the administration table will be designated to receive attempts.

5.4.1. Expeditors are responsible for collecting the weight of required attempts from the lifters or their coaches and passing the information without delay to the Speaker or the official appointed. The lifter is allowed one minute between completing his last attempt and informing the Speaker, via the Scorekeeper or official appointed, of the weight required for his next attempt.

5.4.2. If computer scoring software is being used, the Expeditors must work in conjunction with the scorekeeper to insure that has computer generated attempt cards/slips are filled out properly and that the lifter initials each ensuing attempt.

5.5. Scorekeeper/Computer Operator ~ Responsibilities are as follows:

2.5.1. Scorekeepers, in conjunction with the meet director, are responsible for accurately recording the progress of the competition and upon the completion of the competition, ensuring that the three referees sign the official score sheets, record certificates or any other document requiring signatures.

2.5.2. If computer score keeping software is being used, the scorekeepers and/or computer operators should have full knowledge of the software's function and capabilities. They are both responsible for accuracy.

2.5.2.1. In conjunction with the score keeping software, the scorekeepers and/or computer operators are responsible for the data input of all the lifters personal information (weight class, scale weight, age, etc.), the lifters attempts, creation of attempt cards/slips, the structuring of the lifting flights and the completion and accuracy of the final score sheet.

2.5.2.2. The scorekeepers and/or computer operators are also responsible for the creation of any document, within the software's capabilities, that the meet director requires to post flight listings, contest sub-totals and lifter placing prior to the completion of the competition.

5.6. Spotter/Loaders ~ Responsibilities are as follows:

5.6.1. Spotter/Loaders are responsible for loading and unloading the bar, adjusting squat racks, mono-lift and/or benches as required, cleaning the bar or platform at the request of the Head Referee, and generally ensuring that the platform is well maintained and presents a neat and tidy appearance at all times.

5.6.2. At no time shall there be less than two or more than five Spotter/Loaders on the platform.

5.6.3. When the lifter prepares for his attempt, the Spotter/Loaders may assist him in removing the bar from the racks. They may also assist in replacing the bar after the attempt. However, they shall not touch the lifter or the bar during the actual attempt, the period of time that elapses between the commencement and completion signals. The only exception to this rule being that if the lift is in jeopardy and likely to result

in an injury to the lifter, the Spotter/Loaders may, either at the request of the Head Referee or the lifter himself, step in and relieve the lifter of the bar.

- 5.6.4. If the lifter is deprived of an otherwise successful attempt by the error of a Spotter/Loader and through no fault of his own, he may be awarded another attempt at the discretion of the referees at the end of the round.
- 5.6.5. A sixth person will be allowed on the platform, only when a mono-lift or equivalent is in use, to control the swing arms lever and pin.
- 5.7. Records Processor ~ Responsibilities are as follows:
 - 5.7.1. The Records Processor is accountable for all records broken at sanctioned USPF meets. Upon the completion of the competition, the Records Processor must assure the meet director that all successful record attempts have been verified and noted within the official score sheet. This will allow the meet director to submit the score sheet to the proper Records Chairman as specified in Part 9. Note: Record attempts outside 2.5 kg or 5 lb increments and 4th attempts may only be requested for that particular level of competition, e.g., only World Records may be requested at World or National championships, etc.
- 5.8. Additional officials may be appointed as needed, i.e. doctors, paramedics, etc.
6. During any competition-taking place on a platform or stage, only the lifter and his coach, officiating referees and spotter/loaders will be allowed around the platform or on the stage. During the execution of a lift, only the lifter, spotter/loaders and the referees are permitted to be present on the platform. Coaches shall remain within the designated coaching area as defined by the Technical Chairman or Chief Referee in charge.
7. A lifter shall not wrap or adjust any part of his costume or equipment within the vicinity of the platform. The only exception to this rule is that he may adjust his belt. Items such as chalk, inhalants, etc. cannot be utilized within the vicinity of the platform.
8. Three unsuccessful attempts in any lift will automatically eliminate the lifter from the competition.
9. Other than the initial removal of the bar from the racks, the lifter will not receive any help from the spotter/loaders in positioning himself for an attempt.
10. Upon the completion of an attempt, a lifter shall leave the platform within thirty seconds. Failure to comply with this rule may result in disqualification of the attempt at the discretion of the referees. The only exception to this rule is if a lifter's equipment is being inspected after a record attempt. The lifter is required not to leave the platform for this inspection to certify the records attempt.
11. If, during warm up or competition, a lifter suffers injury or in any other way exhibits signs of a condition which may unduly or significantly jeopardize the competitor's health and well-being, the official doctor has the right to examination. If the doctor considers it inadvisable for the lifter to continue, he may, in consultation with the Technical Chairman or Chief Referee and referees, insist upon the lifter retiring from the competition. The team manager or a coach must be officially informed of such a decision.
12. Any lifter or coach, who by reason of his misconduct upon or near the competition platform is likely to discredit the sport, shall be officially warned. If the misconduct continues, the Technical Chairman or Chief Referee and officiating Officials, may disqualify the lifter and order the coach to leave the venue. The team manager must be officially informed of both the warning and disqualification.
13. Banging the head on the bar (e.g., before squatting) will not be permitted. The lifter will be warned once. Any further violations will result in the disqualification of the lifter.

14. Any physical abnormality, handicap, or incapacity of a lifter that may cause an inability to fully comply with the rules should be brought to the attention of, and explained to, the appointed Contest Officials. This should be in advance of the start of the lifter's Flight. The lifter, Contest Officials, and the platform referees for the particular lifter will then confer on the matter to best accommodate any special considerations for the lifter. Deafness, blindness, limb, or joint abnormalities that prevent proper straightening or extension, are examples for such special considerations.
15. If a lifter missing a minimum of 50% of their total fingers, including the thumb, in which that hand is responsible for gripping a bar in the deadlift, is permitted the use of a strap. However, this strap may be used on that hand and attached at the wrist only.
16. In USPF recognized competitions, the weight of the barbell must always be a multiple of 2.5 kg or 5 lb, depending upon the discs being used. The progression must be at least 2.5 kg, or 5 lb for Standard/Olympic discs, between all attempts. The weight shall be announced in kilograms (except when using Standard/Olympic discs). Exceptions to this rule are as follows:
 - 16.1 In a record attempt, the weight of the barbell must be at least 500 grams (.5 kg or 1 lb) in excess of the current record. This record attempt must be taken in the normal sequence of increasing weight during the competition.
 - 16.2 During the course of the competition, a lifter may request a record attempt that is not a multiple of 2.5 kg or 5 lb but is to be attempted within his prescribed attempts.
 - 16.3 Record attempts may be taken on any or all of a lifter's prescribed attempts provided that he maintains a minimum increase of 500 grams (.5 kg or 1 lb).
17. The Head Referee will be solely responsible for decisions taken in the case of loading errors or incorrect announcements by the speaker. His decision will be given to the speaker who will make the appropriate announcement. Examples of Errors in Loading are as follows:
 - 17.1 If the bar is loaded to a lighter weight than originally requested and the attempt is successful, the lifter may accept the successful attempt or elect to take the attempt again at the originally requested weight. If the attempt is not successful, the lifter will be granted a further attempt at the originally requested weight. In both the above cases, further attempts may only be taken at the end of the round in which the error occurred.
 - 17.2 If the bar is loaded to a heavier weight than originally requested and the attempt is successful, the lifter will be granted the attempt. However, the weight may be reduced again if required for other lifters. If the attempt is not successful, the lifter will be granted a further attempt at the originally requested weight at the end of the round in which the error occurred.
 - 17.3 If the loading is not the same on each end of the bar; or any change occurs to the bar or discs during the execution of the lift; or the platform is disarranged, if despite these factors, the lift is successful, the lifter may accept the attempt or elect to take the attempt again. If the successful attempt is not a multiple of 2.5 kg, then the lower closest multiple of 2.5 kg will be recorded on the score sheet. If the attempt is unsuccessful, the lifter will be granted a further attempt. Further attempts may only be taken at the end of the round in which the error occurred.
 - 17.4 If the speaker makes a mistake by announcing a weight lighter or heavier than that requested by the lifter, the Chief Referee will make the same decisions as for errors in loading.
 - 17.5 If for any reason it is not possible for the lifter or his coach to remain in the vicinity of the platform in order to follow the progress of the competition and the lifter misses his attempt because the speaker omitted to announce him at the appropriate weight, then the weight will be reduced as necessary and the lifter allowed to take his attempt, but

only at the end of the round.

18. Application for participation at a National Championships must include the lifter's qualifying Total or Best Lifts for Single Lifts, along with the USPF competition's name, date and location, within 12 months of the National Championships. Only qualifying Totals or Single Lifts achieved at a USPF competition will allow a lifter to be considered eligible or qualified to participate in a National Championships with no exceptions.
19. Application for participation at a World Championships must include the lifter's best total, along with the USPF competition's name, date and location, within 12 months of the World Championships. Only totals achieved at National Championships will allow a lifter to be considered eligible or qualified to participate in a World Championships with no exceptions.
20. In International matches between two lifters or two Nations contested in different bodyweight categories, the lifters may alternate irrespective of weight required for the attempts. The lifter requiring the lightest weight in his initial lift shall lift first and thereby set the order for the alternate attempts throughout that particular lift.
21. In International competition, all appeals against referee's decisions, complaints regarding the progress of the competition or against the behavior of any person or persons taking part in the competition must be made to the Jury. The process is as follows:
 - 21.1. The Jury may require the appeal to be made in writing.
 - 21.2. The appeal or complaint must be lodged with the Chairman of the Jury by the team manager, or in his absence, by the team coach. This must be done immediately following the action upon which the appeal or complaint is based.
 - 21.3. If deemed necessary, the Jury may temporarily suspend the progress of the competition and retire to consider its verdict. After due consideration, and upon reaching a majority verdict, the Jury will return and the Chairman will inform the complainant of its decision.
 - 21.4. The Jury's verdict will be considered final and there will be no right of appeal to any other body.
 - 21.5. Upon recommencement of the competition which has been suspended, the next lifter shall be given three minutes in which to commence his lifting.
22. Jury is as follows:
 - 22.1. To preside over World and National Championships during each lifting session.
 - 22.2. Three Referees, senior Referee will be President of the Jury.
 - 22.3. World Events, Referees shall be selected from different nations with the exception of the USPF President and Technical Chair.
 - 22.4. Ensure that the technical rules are applied correctly.
 - 22.5. Remove a Referee by majority vote whose decisions on calls are incompetent. Referee must be warned prior to dismissal and allowed to give an explanation for his actions.
 - 22.6. To overturn a serious refereeing mistake by granting a lifter another attempt if deemed necessary. A Jury at no time can overrule or change the calls of the referees.
 - 22.7. The Jury President must ensure himself that all the members of the Jury are aware of the current USPF Rules, new rules, amendments and changes.
 - 22.8. If music is allowed, the Jury will determine the volume and shall terminate when a lifter steps on the platform.

Part 7. REFEREES

1. The referees shall be three in number, the Head (Center) Referee and two side referees.

1. Head Referee: Faces front of platform with back to audience.
2. Side Referees
3. Front of platform.
4. Main switch to light box controlled by the Head Referee.

- 1.1. The same referee must be seated throughout an entire flight once it starts. No referee changes can occur once a flight has begun. However, the only exception to this rule is if a record breaking attempt is being made and the required referee classifications are not met by the existing seated referees (ex., two National referees are needed for an American record).
2. The Head Referee, preferably the highest ranking Referee, is responsible for giving the necessary signals for all three lifts.
 - 2.1. Signals required for the three lifts are as follows:
 - 2.1. SQUAT
 - 2.1.1. Commencement: A visual signal consisting of a downward movement of the arm together with the audible command "squat".
 - 2.1.2. Completion: A visual signal consisting of a backward movement of the arm together with the audible command "rack".
 - 2.2. BENCH PRESS
 - 2.2.1. Commencement: An audible command of "start".
 - 2.2.1. Mid (after pause at chest): An audible command of "press".
 - 2.2.3. Completion: A visual signal consisting of a backward movement of the arm together with the audible command "rack".
 - 2.3. DEADLIFT
 - 2.3.1. Commencement: No signal required.
 - 2.3.2. Completion: A visual signal consisting of a downward movement of the arm together with the audible command "down".
3. Once the bar has been replaced in the racks or on the platform at the completion of the lift, the referees will announce their decisions by means of the lights; White for a "good lift" and red for "no lift".
4. The three referees may seat themselves in what they consider to be the best viewing positions around the platform for each of the three lifts. However, the Head Referee must always bear in mind the need to be easily visible to the lifter performing the squat or dead lift. If possible

the side referees should not be seated behind the lifter or below the level of the platform.

5. Before the contest, the three referees shall jointly ascertain that:
 - 5.1. The platform and competition equipment comply in all respects with the rules. Bars and discs are checked for weight discrepancies and defective equipment discarded.
 - 5.2. The scales work correctly and are accurate.
 - 5.3. The lifters weigh in within the limits of weight and time for their bodyweight category.
 - 5.4. The lifters costumes and personal equipment comply with the rules in all respects.
6. During the contest the three referees must jointly ascertain that:
 - 6.1. The weight of the loaded bar agrees with the weight announced by the speaker. Referees may be issued with bar loading charts for this purpose or a computer generate bar loading software may also be used and projected on to a screen that is in a clear and visible location, from the platform, for the three referees.
 - 6.2. On the platform the lifter's costume and personal equipment are exactly as declared, examined and marked at the weigh in. If any referee has reason to doubt a lifter's integrity in this respect, he must at the completion of the lift, inform the Head Referee of his suspicions. The three referees may then re-examine the lifters costume and personal equipment. If the lifter is found to be wearing or using any illegal item, the lifter will immediately be disqualified from the competition.
7. Prior to the commencement of a lift, if either of the side referees do not accept the bar placement or starting position of the lifter, they will raise a hand to call attention to the fault. If there is a majority opinion among the referees that a fault exists, the Head Referee will not give the signals to commence the lift. If the lifter only entered and completed the Raw Full Power Open, he cannot apply for records in the Masters 40-44 or the Single Lift Deadlift.

6. Records are only valid if the lifter makes a Total in the competition event(s) entered. He must complete at least one “good lift” in each of the three attempts. The lifter cannot “bomb” and then apply any “good lifts” towards records in the event in which he did not successfully complete. No exceptions.

Example: If a lifter enters a Full Power event and does not make any of his three deadlift attempts, subsequently “bombing”, he cannot apply for any Squat, Bench Press, or Total records even though those lifts were good. If the lifter also entered Single Lift Bench Press, he could only apply for the Single Lift Bench Press record.

 - 7.4. Only lifters competing in a competition may attempt records as fourth attempts outside the competition.
 - 7.5. Fourth attempts are not valid towards the lifter’s competition scoring, Totals, or meet placement.
 - 7.6. In no case can any further additional attempts be granted.
8. The lifter must advise the Scorekeeper of any American and/or World Record attempts. The Scorekeeper will note it on his scorecard or attempt sheet.
9. The lifter must advise the Head Referee of any American and/or World Record attempts before the lift. The Head Referee will then insure the proper ranked referees are in place.
10. Immediately following a successful record attempt, the lifter shall present himself for inspection by the Head Referee to assure all of his costume and equipment was approved during the equipment check. The lifter’s costume and equipment cannot be substituted with an alternative piece(s) that was not approved.
11. In the event of two lifters breaking either a current individual or Total record of the same weight, the lighter lifter will be declared the new record holder. If both lifters originally weighed in at the same weight, they must be reweighed. If both lifters reweigh at the same bodyweight, both will be declared record holders.
12. New records are only valid if they exceed the previous record by at least 500 grams or 1 pound and are only recorded to the tenth of the weight.

This policy is intended to supplement but not replace any applicable state and federal laws governing conflict of interest applicable to nonprofit and charitable organizations.

Article II

Definitions

1. Interested Person

Any director, principal officer, or member of a committee with governing board delegated powers, who has a direct or indirect financial interest, as defined below, is an interested person.

board or committee decides that a conflict of interest exists.

Article III

Procedures

After disclosure of the financial interest and all material facts, and after any discussion with the interested person, he/she shall leave the governing board or committee meeting while the determination of a conflict of interest is discussed and voted upon. The remaining board or committee members shall decide if a conflict of interest exists.

- c. After exercising due diligence, the governing board or committee shall determine whether the Organization can obtain with reasonable efforts a more advantageous transaction or arrangement from a person or entity that would not give rise to a conflict of interest.
- d. If a more advantageous transaction or arrangement is not reasonably possible under circumstances not producing a conflict of interest, the governing board or committee shall determine by a majority vote of the disinterested directors whether the transaction or arrangement is in the Organization's best interest, for its own benefit, and whether it is fair and reasonable. In conformity with the above determination it shall make its decision as to whether to enter into the transaction or arrangement.

4. Violations of the Conflicts of Interest Policy

- a. If the governing board or committee has reasonable cause to believe a member has failed to disclose actual or possible conflicts of interest, it shall inform the member of the basis for such belief and afford the member an opportunity to explain the alleged failure to disclose.
- b. If, after hearing the member's response and after making further investigation as warranted by the circumstances, the governing board or committee determines the member has failed to disclose an actual or possible conflict of interest, it shall take appropriate disciplinary and

corrective action.

Article IV

Records of Proceedings

The minutes of the governing board and all committees with board delegated powers shall contain:

- a. The names of the persons who disclosed or otherwise were found to have a financial interest in connection with an actual or possible conflict of interest, the nature of the financial interest, any action taken to determine whether a conflict of interest was present, and the governing board's or committee's decision as to whether a conflict of interest in fact existed.
- b. The names of the persons who were present for discussions and votes relating to the transaction or arrangement, the content of the discussion, including any alternatives to the proposed transaction or arrangement, and a record of any votes taken in connection with the proceedings.

- c. Has agreed to comply with the policy, and
- d. Understands the Organization is charitable and in order to maintain its federal tax exemption it must engage primarily in activities which accomplish one or more of its tax-exempt purposes.

Article VII

Periodic Reviews

To ensure the Organization operates in a manner consistent with charitable purposes and does not engage in activities that could jeopardize its tax-exempt status, periodic reviews shall be conducted. The periodic reviews shall, at a minimum, include the following subjects:
