

CASE STUDY

> Situation

On February 24, 2020, Mike and Kathy Light were at home when their neighbor's house caught on fire and spread to their home, burning it completely to the ground. After coming to terms with the loss of their house and personal possessions, the Lights quickly turned to their insurance company to make sure they were insured with enough money to rebuild their home. In addition to the fire, during the restoration Mr. Light became ill so a lot of the decisions would have to be made by Mrs. Light. For her, the rebuilding process would have to be easy and stress free so she could focus on her husband.

> Solution

The Lights did not know of any fire restoration contractors, so their insurance agent recommended The Premier Group to restore their home due to their expertise, knowledge and overall experience. Right from the start, The Premier Group team worked closely with the Lights to reduce any amount of stress and ensure the project ran smoothly.

> We Provided

The Premier Group team worked diligently over the next several months to restore the home as quickly as possible. Our team demoed the entire house taking it down to the foundation, as well as cleaned and sealed the basement walls and floor to eliminate the smell of smoke. We then began rebuilding the entire house, including framing, siding, stonework, woodworking, drywall, painting, electrical, flooring and finishing.

> Result

The Premier Group restored over 1,500 square feet which included a new 120 sq ft eat in area. We were able to deliver a brand-new house to the Lights in just under nine months (30 days ahead of schedule) and on budget.

Bobby and The Premier Group made it easy on me to get what I needed to pick out for the house. With my husband Mike being sick I couldn't get out of the house to pick out fixtures and finishes. Bobby always sent me selection via pictures and took that stress off my shoulders so we could get the house built and Mike wouldn't be left alone.
