

Possible Site for Menorah Earthworks Crane Run

The Virginia Military District was approximately 4.2 million acres of land in Ohio which was reserved by Virginia as payment in lieu of cash for its veterans of the American Revolutionary War. William Lytle's father was an officer in George Washinton' army. William Lytle made an important amount of money with the Virginia Military District. The possibility of Crane Run as the site for the Menorah Earthworks is increased because in 1803 Lytle owned Land Parcel M.S. 4247. It seems that his 1803 Map, which he showed to President Thomas Jefferson, was drawn from earthworks which were on his land. GPS Coordinates for site are 39.072232,-84.021498.
