

CERTIFIED DATA MANAGEMENT PROFESSIONALS (CDMP)

Professional certification is an indication of knowledge, skills and experience in a field. DAMA International has constructed the Certified Data Management Professional (CDMP) designation. The certification workshop gives data management professionals the opportunity to show professional growth that can enhance their personal and career goals.

Workshop Overview:

The Certified Data Management Professionals (CDMP) is a 2-days workshop addresses all the Information Management disciplines as defined in the DAMA body of knowledge (DMBoK) & introduces the “new” discipline of “Data Integration” introduced in DMBoK 2.0. This workshop provides a solid foundation across all of the disciplines across the complete Information Management spectrum. After attending the workshop, attendee will get a firm grounding of the core Information Management concepts and illustrate their practical application with real examples of how Information Architecture is applied.

In additional, the workshop provides a solid foundation for your wishing to consider proceeding to take the DAMA CDMP Industry professional certification. This workshop is designed and taught by certified CDMP and aims at preparing you to set-for the CDMP Fundamental Examination.

Workshop Outline:

- CDMP overview; Introduction to the DMBoK; Data Governance; Data Quality Management;
- Master & Reference Data Management; Data Warehousing & BI Management; Data Modelling;
- Metadata Management; Data Architecture Management; Data Lifecycle Management; Data
- Security & Privacy; Regulatory Compliance; Data Risk Management; Data Integration & Interoperability.

Learning Objectives:

Gain familiarity with the CDMP fundamentals examination format, types of questions and the most appropriate way of answering them. Understand and revise the major syllabus points. Practice taking the examinations to pass the CDMP examinations and gain recognition for your professional experience.

Who Should Attend?

Practitioners who seek Professional recognition and certificate for Information Management including business intelligence & data warehouse developers & architects, data modellers, developers, data architects, data analysts. Enterprise architects, solution architects, application architects, information architects, business analysts, database administrators, project/programme managers, IT consultants, data governance managers, data quality managers and information Quality practitioners.
