

GRC Professional Certification (GRCP)

What is GRC?

GRC stands for **G**overnance, **R**isk, and **C**ompliance

GRC is an integrated collection of all necessary capabilities that support and improve an organization by enabling the organization to reliably achieve objectives, address uncertainty and act with integrity.

The advantage of GRC is to establish a way to ensure that the right people get the right information at the right time, and to establish the right goals with the right actions and controls to address uncertainty and integrity actions.

When GRC is done right, an organization can reduce costs, reduce duplication of activities, reduce impact on operations, achieve greater information quality, achieve greater ability to gather information quickly and efficiently, achieve greater ability to repeat processes in a consistent manner.

GRC Professional Certification (GRCP)

GRCP certification ensures that an individual has the core understanding of GRC processes and capabilities, and the skills to integrate governance, performance management, risk management, internal control, and compliance activities.

The GRCP certification gives assurance that the GRC Professional has core knowledge, skills and understanding of managing and advising on risk, internal controls, key compliance matters and functions compliance, and how these must be integrated for effective and appropriate governance.

Getting a GRCP is the perfect way to enhance an existing certification or to upgrade your skills in areas where you lack experience so that you can do even better work across all GRC disciplines.

What will you learn in this 1-day workshop?
