

Kanban Management Professional (KMP 2)

Overview

Kanban is a set of values, practices and principles that bring the benefits of Lean theory to organizations. Benefits include :

- increasing the flow of value
- visualizing and establishing an optimum workload for the team's capacity
- reducing waste
- creating better organizational alignment
- building a culture of engaged workers

The Kanban method focuses on making incremental, iterative changes that evolve business processes into more efficient and manageable work streams while avoiding the risks associated with complex change programmes.

The **Kanban Management Professional (KMP 2)** program offers an in-depth and insightful peek into the world of Kanban. Building information flow, understanding and managing resistance to change, improving service delivery are some key aspects that would be covered in this program. This program sets you up for success and lays out the path for a successful Kanban Transformation in the enterprise.

Syllabus and Agenda

The course follows the official KU Certified Kanban syllabus. During the two days you will have ample opportunities to discuss and experience the following topics:

- Motivation for the Kanban method
- Proto Kanban
- Enterprise-level Kanban case study
- Understanding the Kanban system
- Definition of the Kanban Method
- Kanban litmus test
- STATIK
- Service Delivery Kanban
- Scaling Kanban out across an organization
- Conducting Kanban Meetings
- Delivery Planning
- Kanban Roles
- Feedback loops to improve service delivery
- Commitment and replenishment
- Removing Delays
- Understanding Variability
- Managing bottlenecks
- The risk review
- Economic Costs
- Evolutionary approach to change management.

Prerequisites

- *It is recommended to have either completed KMP 1 (Kanban System Design) before attending this program as it lays the necessary foundations .*
- *Have read the 'Kanban' book by David J Anderson or 'Kanban from the Inside' by Mike Burrows.*

Audience

Kanban is for everyone ! Kanban works across the organization, from executives to members of delivery teams willing to improve their working practices. However, for this program - it is best attended by folks who have :

- *already mastered the Kanban basics by applying Kanban in their organization, and want to take their implementations to the next level.*
- *The desire to keep momentum going beyond the initial improvements realized from the Kanban system introduction*

Certification

Participants will receive a certificate of completion for KMP2 program from Kanban University (KU) as well as lifetime membership of Kanban University that allows you to get listed in the Kanban University Alumni directory.

Attendees who complete both KMP1 & KMP2 classes are eligible for the Kanban Management Professional credential. This is bestowed automatically by Kanban University if the trainings were officially listed on the KU training programs website. The program also allows you to claim up to 16 SEU's from Scrum Alliance and 16 PDUs from PMI.
