WH Peacock *Auctioneers & Valuers*

Founded in 1901, W&H Peacock have been conducting weekly auction sales in and around Bedford for over a century.

Their ever expanding business meant that they had outgrown their original property in the heart of Bedford and required them to have a purpose built unit situated at Eastcotts Park. The unit boast 5 auction rooms, reception area, offices, meeting rooms and a fully serviced restaurant.

Your Project
Is Our Project

Project Specifications

The recently opened new build WH Peacock Auction House in Bedford required a multi-zone audio system installation that could be zoned according to how the rooms are partitioned.

The system also needed to allow multiple auctioneers to use lapel worn radio microphones independently.

Mandek Electrical were given the task of supplying and installing the audio system for which they used Monacor's Commercial Audio range.

Equipment Specifications:

The EDL-420 Pendant loudspeakers were installed into the high level and the EDL-8 Ceiling loudspeaker into the lower ceilings to give good coverage and vocal intelligibility. Multiple PA-12040 4 x 120w Mixing Amplifiers gave the system a matrixed audio system to allow the TXS-831 lapel radio microphones to be assigned to the relevant zones.
