

ZERO BEAT

March 2020

Next Meeting, Thursday, 9 April 2020 1900 hours

On the W4TRC 2 Meter repeater: 146.970 MHz, (-) PL Tone, 123.0 Hz.

Program: To be announced

KARC / BMRC March 2020 meeting minutes

The March 12th meeting was called to order by the Club President Rick Johnson WB4RLJ - The Pledge to the American flag was recited followed by a word of prayer provided by John Williams.

A motion was made to accept the Secretary's report as printed in the Zero Beat. This was seconded and passed unanimously.

The Treasurers report was read by Neil Weber. A motion was made, seconded and passed unanimously. Detailed in the report was that we currently have 22 paid memberships where at this time last year we had 30. Also the club liability insurance will be due in June and following that we may need donations toward field day and picnic expenses. Field day will be June 27 -28 in shelter house #3 at Warriors Path Park.

Repeater report - machines are up and running and receiving good use. A site inspection visit is still in the works as weather etc. permits.

Web site - site is up and contains excellent content, Larry Dale welcomes new content from anyone wishing to do so.

Sunday weekly net - Great participation every week. Carl Hacker will not be calling the net on the 4th. week due to radio path issues and George W3KPT offered to pick up that 4th. week in the rotation.

Old business - The club communications trailer project did not make the draw for a grant in this latest round, however we will "remain in the race" for the next draw. we will be looking at school and educational opportunities to promote the club and this project.

New business - Discussions will be had to look into future events such as a special event station at the Exchange place and possibly doing things like "Parks on the Air".

With no further business the meeting was adjourned and the attendees were treated to a presentation by Neil Weber on Hex Beam Antennas.

Reports and Essays

Antennas At The Condo

By Larry Dale KD4FTN

I have moved. I have moved to a place where I share my building with two others. I have acquired a monthly HOA expense. And lastly, I am prevented from putting up... antennas.

Oh My Goodness!!!! What Have I Done To Myself!!!! I have always said "I will never move to a condo or acquire HOA fees. What is that phrase we have all been told so often to never, never say? Why it is "I will never"...

The reason we moved to this location is simply that it is perfect for my wife and I at this time in our life. Therefore...

So I hid my antennas. As you can see, my JPole is located in a cluster of trees. It works Great!!! But I plan to purchase a longer PVC and paint the PVC and JPole black, thereby making it harder to see.

I purchased my JPole from <https://www.jpole-antenna.com> and my RG-8U from DX Engineering.

The antenna I use for SOTA has given me magnificent results. Therefore, I chose to use the same 35 foot end-fed antenna and hid it in the trees. I can't even see it!!! As you know, propagation is everything and this hobby, like all electronics, is Magic (mostly theory). I love this little antenna because I get good results from it.

The hf antenna is good for 40-6m at 100w. I have used it on 80m. It was purchased from <https://kx3helper.com> and the RG-8X from DX Engineering.

Blessings,

Larry
KD4FTN

Reprise from February *Zero Beat*

Perhaps your bout of Cabin Fever needs a project to distract you. Why not use your radio and complete the following exercise?

Nets and repeaters listed in *Zero Beat*

Several nets and repeaters are listed in the *Zero Beat*. There are two projects for members of the club this month and indeed at any time. The first project will be to check into the net and if appropriate get a signal report. Then report to me the date you checked in, your location when checking in, and the signal report you received and the power you were using. Use the following e-mail address: carl.hacker@outlook.com.

The second project will be to monitor the repeaters used by the nets when it is convenient and, if you can join in a QSO, get a signal report. Then report the same observations to me when convenient. I will compile these observations and report the outcome in future additions of *Zero Beat*.

Thank you for your willingness to begin what I intend will be a larger and more methodically designed study of coverage footprints of several popular (i.e. chatty) repeaters in our area. Where my interest is motivated by the Skywarn program, other amateur radio activities could find value with this information.

Articles and Reports for *Zero Beat* ??

Please submit these to wc5wm@arrl.net

George DeVault is preparing a article to be published soon. Regular readers of the journal are familiar with his work and will appreciate reading more from him. Another member of the club is attending a program on using amateur radio for public service events (not ARES, Skywarn, or bicycle races) and I am nudging him to file a report or article soon.

THE ZERO BEAT NEWSLETTER

Is published monthly by the Kingsport Amateur Radio Club and Bay's Mountain Radio Club. For more information on **Zero Beat**, please contact: Carl Hacker at WC5WM@arrl.com.
