FIRST FLOOR PROPRIETARY SPECIFICATION

Textured Stones

Interface®

Installation Method

All product specifications reflect averages derived from product sample testing, are subject to normal manufacturing and testing tolerances and inherent pattern variances, and may be changed without notice. For more information about these and other important attributes of the product(s) described herein, including recycled content and product warranty information, please see www.interface.com/disclaimer.

Product	Textured Stones Collection	Color	Light Concrete	Collection	Level Set
Product Specifications					
Product Number	A003				
Product Construction	High Performance Luxury Vinyl Tile				
Class / ASTM F1700	Class III Printed Vinyl Tile				
Wear Layer Thickness	22 MIL				
Total Thickness	4.5 mm				
Backing Class	Commercial Grade				
Finish	Ceramor				
Nominal Dimensions	50 cm x 50 cm (19.69 in x 19.69 in)

Installation Method	Monolithic Quarter Turn Non Directional Ashlar Brick

The Interface Textured Stones LVT product has been specified for its noise reduction, ADA compliant slip resistance, and environmentally friendly qualities. With an IIC sound rating of 64 IIC and slip resistance of >0.55 wet/dry the product stands out to us for use. In addition, the product is a carbon neutral product made of 39% total recycled content (pre consumer). The indoor air quality was very important to us on this project as well from installation until the end of product lifecycle, so the GREENGUARD GOLD indoor air quality rating is increases product worth as well as the material composition that is free of ortho phthalates, added formaldehyde and heavy metal stabilizers. Lastly, at the end of product lifecycle, the Interface Textured Stones LVT can be recycled through ReEntry.

reddit

SECOND FLOOR PROPRIETARY SPECIFICATION

The “Off the Wall” carpet is placed in the conference rooms on the second floor. The product was intended to keep the color scheme from ceiling to floor while providing a sustainable product. The product is made from 51% recycled material and embodies 1.45 kg CO2e/ft2. Off the wall has a CRI Green Label Plus for indoor air quality, which allows employees to work in an environmentally sound building. Within Reddit’s headquarters, we have tried to select the most sustainable products in order for the American based company to adapt to Germany’s focus on sustainability.

Off The Wall

Collection	Street Thread
Style Name	Off The Wall
Style Number	GT195
Product Type	Carpet Tile
Size	24" X 24"
Construction	Tufted
Installation	Quarter Turn, Vertical Ashlar, Brick Ashlar

Feature	Description
Backing Material	EcoFlex NXT
Fiber Type	Duracolor® Premium Nylon
Dye Method	Solution Dyed / Yarn Dyed
Installation Methods	Quarter Turn, Vertical Ashlar, Brick Ashlar
Stitches per Inch	11 (43.31 per 10cm)
Density	7459
Tufted Pile Weight	23.00 oz/yd2 (780 g/m2)
Surface Texture	Textured Patterned Loop

THIRD FLOOR PROPRIETARY SPECIFICATION

The Wink Wallcovering product is a wallcovering that allows users to write on walls with the convenience of a dry-erase performance. This dry-erase wallcovering also includes magnetic and projection capabilities. I want to include it in my project because it is able to be applied to any wall and is easy to use. The benefits include a low VOC content, consistent with Greenguard standards, made for long term use, and is produced with low emitting materials. Not only is the Wink Complete easy to use, but convenient for all. I think this product will be beneficial for all employees. All they need are dry erase markers for writing and a microfiber cloth for removal. A clean environment is wanted in our Reddit office and the non-ghosting aspect when erasing provides this for us.

WINK COMPLETE WINK COMPLETE

Physical Properties

Content: 100% Polyethylene Face
Finish: Low sheen UV coating
Backing: Magnetic vinyl
Width: 48"
Weight: 800.00 oz per each

Performance

Fire Rating: Class B, as per ASTM E84 (Adhered)
Flame Spread: 55 / Smoke Developed: 90

Sustainability

Free of PFC/PFOA/PFOS, conflict minerals, heavy metals,
phthalates(BBP, DBP, DEHP, DIDP, DINP, DnHP, DnOP)

Pricing

\$1520.00 per each

WINK® WALLCOVERINGS PRODUCT SPECIFICATIONS

Wink.

WolfGordon

Please refer to the *Installation and Maintenance Guidelines* for each product for more details.

Standard Roll 26.6 ft long x 4 ft wide (*Scribe/Projection*: 12.6 lbs; *Magnetic/Complete*: 26.46 lbs)

Coverage Approximately 107 square feet

Characteristics

- Superior writing and dry-erase performance, made for long term use
- Smooth, white surface (*Scribe/Magnetic*: high gloss; *Projection/Complete*: low sheen)
- Low Volatile Organic Compound (VOC) content, compliant with Cal 01350
- Non-ghosting and non-staining PET (polyethylene terephthalate) film surface
- Scribe/Projection*: Class A fire rating as per ASTM E84; *Magnetic/Complete*: Class B

Applications Apply to smooth surfaces including painted drywall, chalkboard, plaster, wood, and metal. *Scribe/Projection*: Heavy duty clay or clear adhesives should be used; *Magnetic/Complete*: Extreme tack, vinyl over vinyl adhesives should be used. Refer to *Installation and Maintenance Guidelines* for more details.

Preparation Surface should be dry, prepared to Level 4 or 5 smoothness, and free of grease, mildew, dust, foreign contaminants, and any imperfections. Absorbent surfaces should be treated with a high quality, white, stain-blocking primer. Please refer to the *Installation and Maintenance Guidelines* for more details. Scuff sanding is recommended for high-gloss surfaces.

Cure Time *Scribe/Projection*: allow 24 hours for adhesive to fully dry; *Magnetic/Complete*: allow 48 hours

Environmental Attributes

- All wallcoverings are free of heavy metals, isocyanates, perfluorinated compounds, and toxic phthalates; *Scribe/Projection*: also PVC free; *Magnetic/Complete*: contain some PVC in magnetic material underneath the exposed layers
- Low VOC content, consistent with Greenguard standards
- PET film surface is formulated with up to 25% recycled content and PVC free
- Qualifies for contribution to LEED v4 for Low Emitting Materials

Writing/Drawing Most new standard dry erase markers can be used on the Wink wallcovering surface

Cleaning For daily erasing and cleaning, use a clean microfiber cloth. On a weekly basis, use a mild dry-erase cleaner or a mixture of gentle dish soap and water with a microfiber cleaning cloth. Cleaning products containing harsh solvents or alcohol should not be used. See Care and Maintenance guidelines.

Warranty 5-year limited warranty from date of shipment

FOURTH FLOOR PROPRIETARY SPECIFICATION

101.08SG

Emerald®
Interior Latex Semi-Gloss

K38 Series

CHARACTERISTICS

Emerald Interior Acrylic Latex is our "Best-In-Class" interior architectural coating.

Premium performance in washability, stain resistance, block resistance, adhesion, burnish and hiding.

Anti-Microbial properties*

Can only be tinted with CCE Colorants

Color: Most Colors
To optimize hide and color development, always use the recommended P- Shade primer

Coverage: 350 - 400 sq.ft. per gallon @ 4 mils wet; 1.5 mils dry

Drying Time, @ 77°F, 50% RH:

Touch: 1 Hour
Recoat: 4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 35-45 units @ 60"

Tinting with CCE only:

Base:	oz. per gallon	Strength:
High Ref White	0-7	SherColor
Extra White	0-7	SherColor
Deep Base	4-12	SherColor
Ultra-deep Base	10-12	SherColor

Extra White K38W00351
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 37 ± 2%

Weight Solids: 52 ± 2%

Weight per Gallon: 10.74 lbs

Flash Point: N/A

Vehicle Type: Styrene Acrylic

Shelf Life: 36 months unopened

WVP Perms (US): 18.45 grains/(hr ft2 in Hg)

*Anti-microbial

This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.

COMPLIANCE

As of 08/17/2020, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	Yes
MIR-Product Lens Certified	Yes
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F. No reduction needed.

Brush:

Use a nylon-polyester brush.

Roller:

For best final appearance when rolling, finish off in one direction, especially for dark colors.

Use a high quality polyester roller cover. For specific brushes and rollers, please refer to our Brush and Roller Guide on sherwin-williams.com

Spray—Airless

Pressure 2000 p.s.i.
Tip .017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Emerald Interior Latex can be used directly over existing coatings, bare drywall, or plaster (cured with a pH of less than 9)

Drywall:

Self-prime using 2 coats of Emerald Interior Latex

or

1 coat Emerald Wall and Wood Primer
2 coats Emerald Interior Latex

Masonry Block: (can be filled to provide a smooth surface or primed if it is a high pH substrate)

1 coat Loxon Acrylic Block Surfac

or

1 coat Loxon Concrete & Masonry Primer
2 coats Emerald Interior Latex

Plaster:

Self-prime using 2 coats of Emerald Interior Latex

or

1 coat Premium Wall and Wood Primer
2 coats Emerald Interior Latex

Wood:

1 coat Premium Wall and Wood Primer
2 coats Emerald Interior Latex

If the wood has bleeding (such as tannin or knot holes), prime with Multi-Purpose Primer.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

Emerald®
Interior Latex Semi-Gloss

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised. Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach-water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (NIOSH approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**
