

RESCOM USA
 GUARANTEED IMMEDIATE
 SANITATION TECHNOLOGIES

AIR & SURFACE DISINFECTION

Disinfected with
 BioProtect Disinfectant

Kills odor creating
 bacteria

Leaves no streaks or
 residue

1 treatment disinfects
 for over 90 days

UV Light purifies the air
 and HVAC System

No Maintenance

Easy Installation no
 major construction

All "Hot Surfaces" will be
 treated

Cost Savings

ResCom USA Cost Savings

You will find that our
 disinfection service is 40%
 below the national average.

National Average for Mitigation

An ordinary disinfection
 company charges between
 \$1.20 – \$1.50 per sq ft.

Peace of Mind

ResCom USA follows CDC guidelines and will develop a plan to disinfect the air and frequently touched areas with your facility

Disinfecting kills germs on surfaces or objects. Disinfecting works by using chemicals to kill germs on surfaces or objects.

This process does not necessarily clean dirty surfaces or remove germs, but by killing germs on a surface after cleaning, it can further lower the risk of spreading infection.

Note: It is important to clean indoor surfaces and objects routinely with soap (or detergent) and water. **However, not every surface needs to be disinfected every time it is cleaned.** Prioritize disinfecting surfaces that ill persons have touched and those that are routinely touched or shared between students.
