

# ["Introductory Abstract"]

## White Paper

### Modernization For Industry 5.0

# ["PTTS-API" METHODOLOGY]

"PARALLEL TECHNOLOGY TRANSFORMATION STACK-ARCHITECTURE PROCESS IMPLEMENTATION" METHODOLOGY

# ["PTTS-API METHODOLOGY" PROTOCOL]

"PTTS-API METHODOLOGY" IMPLEMENTATION & ARCHITECTURE MANAGEMENT PROTOCOL

## PROCESS INNOVATION SUMMARY

The proposed method & protocol will lead to enhanced productivity & security across organizations. It provides for faster deployment of secure & scalable technology solutions & infrastructure. Which can be implemented across the entire organization to being implemented for a single team or even a single user. Becoming a Modernization Accelerator.

## THE NEED & PROBLEM ADDRESSED

Organisations having Legacy Systems in place or Manual Processes find it difficult Modernise & Transform their organisation. The proposed Methodology & Protocol addresses this bottleneck by providing the scope & ability to implement modern technology & business processes in-Parallel to their Legacy/Existing Systems.

## APPLICABILITY

The applicability of the proposed protocol & methodology is sector & industry agnostic. It has huge deployment potential across highly regulated industries like Healthcare & Financial Services (Where Legacy Systems Prevail). To deployment scope in small & micro businesses (Where systems & processes are non-existing or not optimal).

## BENEFITS

- Non-Disruptive To Existing Systems & Business Processes.
- Security Best Practices & Protocols From Base Layer.
- Multi-Vendor, Cloud Native or Hybrid.

## RATIONALE

To provide organisations of all shapes & sizes the ability to modernise faster & at scale. While providing them a wider choice in terms of Vendor & Technology Selections. Helping them achieve higher productivity & enhanced security with the ability to deploy latest technologies from multiple vendors. Making Modernization easy, scalable & cost-effective with higher & faster Return-on-Investments made.
