Dresden Floral Garden
731-364-2240

Flowers are thirsty. The water in the vase is quickly absorbed, so add water daily. Completely change the water in the vase every few days, remembering to clean the vase thoroughly, replace the flower food and recut the stems. Keep flowers away from sunny windows, heating vents and large appliances. Misting flowers with a fine spray bottle adds humidity to the area surrounding the flowers and increases their comfort in dry home and event settings.
