

How to Grow a Rainbow

Lesson Goal: To discuss how rainbows are created in the sky. We will discuss the 2 most important things needed to create a rainbow which is sunlight and water.

Age Group: 4- 5 years old

Contributor: Christie Watts

Supplies List:

- 2 clear cups per child
- Napkins
- Water Soluble Markers

1. First we will make an anchor chart and discuss rainbows.
2. Give each child a napkin and have them color their own rainbow colors where we explained.
3. Once child has colored their rainbow they will fill up to cups of water with teacher assistance.
4. We will make observations and see if our water helps make a rainbow on the rest of the napkin.
